In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

A Publishers Weekly Most Anticipated Book of Spring 2021 From a Pulitzer Prize–winning historian, the powerful story of a fragile nation as it expands across a contested continent. In this beautifully written history of America's formative period, a preeminent historian upends the traditional story of a young nation confidently marching to its continent-spanning destiny. The newly constituted United States actually emerged as a fragile, internally divided union of states contending still with European empires and other independent republics on the North American continent. Native peoples sought to defend their homelands from the flood of American settlers through strategic alliances with the other continental powers. The system of American slavery grew increasingly powerful and expansive, its vigorous internal trade in Black Americans separating parents and children, husbands and wives. Bitter party divisions pitted elites favoring strong government against those, like Andrew Jackson, espousing a democratic populism for white men. Violence was both routine and organized: the United States invaded Canada, Florida, Texas, and much of Mexico, and forcibly removed most of the Native peoples living east of the Mississippi. At the end of the period the United States, its conquered territory reaching the Pacific, remained internally divided, with sectional animosities over slavery growing more intense. Taylor's elegant history of this tumultuous period offers indelible miniatures of key characters from Frederick Douglass and Sojourner Truth to Elizabeth Cady Stanton and Margaret Fuller. It captures the high-stakes political drama as Jackson and Adams, Clay, Calhoun, and Webster contend over slavery, the economy, Indian removal, and national expansion. A ground-level account of American industrialization conveys the everyday lives of factory workers and immigrant families. And the immersive narrative puts us on the streets of Port-au-Prince, Mexico City, Quebec, and the Cherokee capital, New Echota. Absorbing and chilling, *American Republics* illuminates the continuities between our own social and political divisions and the events of this formative period.

A revealing collection that restores Dr. King as being every bit as radical as Malcolm X “The radical King was a democratic socialist who sided with poor and working people in the class struggle taking place in capitalist societies. . . .

The response of the radical King to our catastrophic moment can be put in one word: revolution—a revolution in our priorities, a reevaluation of our values, a reinvigoration of our public life, and a fundamental transformation of our way of thinking and living that promotes a transfer of power from oligarchs and plutocrats to everyday people and ordinary citizens. . . . Could it be that we know so little of the radical King because such courage defies our market-driven world?”

—Cornel West, from the Introduction Every year, Dr. Martin Luther King, Jr., is celebrated as one of the greatest orators in US history, an ambassador for nonviolence who became perhaps the most recognizable leader of the civil rights movement. But after more than forty years, few people appreciate how truly radical he was. Arranged thematically in four parts, *The Radical King* includes twenty-three selections, curated and introduced by Dr. Cornel West, that illustrate King’s revolutionary vision, underscoring his identification with the poor, his unapologetic opposition to the Vietnam War, and his crusade against global imperialism. As West writes, “Although much of America did not know the radical King—and too few know today—the FBI and US government did. They called him ‘the most dangerous man in America.’ . . . This book unearths a radical King that we can no longer sanitize.”

\*\*\*2019 NATIONAL BOOK AWARD FINALIST\*\*\* Winner of the Arab American Book Award in Fiction Finalist for the Kirkus Prize in Fiction Finalist for the California Book Award Longlisted for the Aspen Words Literary Prize A Los Angeles Times bestseller Named a Best Book of the Year by The Washington Post, Time, NPR, Minneapolis Star Tribune, Dallas Morning News, The Guardian, Variety, and Kirkus Reviews Late one spring night in California, Driss Guerraoui—father, husband, business owner, Moroccan immigrant—is hit and killed by a speeding car. The aftermath of his death brings together a diverse cast of characters: Guerraoui's daughter Nora, a jazz composer returning to the small town in the Mojave she thought she'd left for good; her mother, Maryam, who still pines for her life in the old country; Efraín, an undocumented witness whose fear of deportation prevents him from coming forward; Jeremy, an old friend of Nora's and an Iraqi War veteran; Coleman, a detective who is slowly discovering her son's secrets; Anderson, a neighbor trying to reconnect with his family; and the murdered man himself. As the characters—deeply divided by race, religion, and class—tell their stories, each in their own voice, connections among them emerge. Driss's family confronts its secrets, a town faces its hypocrisies, and love—messy and unpredictable—is born. Timely, riveting, and unforgettable, *The Other Americans* is at once a family saga, a murder mystery, and a love story informed by the treacherous fault lines of American culture.

Uniting critical writing on novels, poetry, painting, and ritual, this volume takes a regional approach to the cultures of the Caribbean Basin. Ranging across the linguistic spectrum of the area, it examines cultural production from the Anglophone, Francophone, and Hispanophone islands, Suriname and the Guyanas, and 'Latin' and Central America. The interdisciplinary nature of the collection and the challenge it poses to the balkanization of the region within academic discourse will make it of especial interest to students and scholars of the Caribbean. Inspired by the category of the 'Other America' as developed by Édouard Glissant, the book offers a series of original and stimulating engagements with topics that include nationalism, migration and exile, landscape and the environment, gender and sexuality, and Postcolonial Studies and 'world literature'. In addition to contributions by leading scholars such as Peter Hulme, Theo D'haen, and Lizabeth Paravisini-Gebert, it contains interviews with two renowned novelists from the region, Lawrence Scott and Mayra Santos-Febres. Underpinning the collection is an interrogation of received ideas of the nation-state and a suggestion that regionalism might provide a better optic through which to view the circum-Caribbean – that national consciousness, in other words, must always also be a regional consciousness.

Short history of the discovery and development of South America.

The first popular history of the former American slaves who founded, ruled, and lost Africa's first republic In 1820, a group of about eighty African Americans reversed the course of history and sailed back to Africa, to a place they would name after liberty itself. They went under the banner of the American Colonization Society, a white philanthropic organization with a dual agenda: to rid America of its blacks, and to convert Africans to Christianity. The settlers staked out a beachhead; their numbers grew as more boats arrived; and after breaking free from their white overseers, they founded Liberia—Africa's first black republic—in 1847. James Ciment's *Another America* is the first full account of this dramatic experiment. With empathy and a sharp eye for human foibles, Ciment reveals that the Americo-Liberians struggled to live up to their high ideals. They wrote a stirring Declaration of Independence but re-created the social order of antebellum Dixie, with themselves as the master caste. Building plantations, holding elegant soirees, and exploiting and even helping enslave the native Liberians, the persecuted became the persecutors—until a lowly native sergeant murdered their president in 1980, ending 133 years of Americo rule. The rich cast of characters in *Another America* rivals that of any novel. We encounter Marcus Garvey, who coaxed his followers toward Liberia in the 1920s, and the rubber king Harvey Firestone, who built his empire on the backs of native Liberians. Among the Americoes themselves, we meet the brilliant intellectual Edward Blyden, one of the first black nationalists; the Baltimore-born explorer Benjamin Anderson, seeking a legendary city of gold in the Liberian hinterland; and President William Tubman, a descendant of Georgia slaves, whose economic policies brought Cadillacs to the streets of Monrovia, the Liberian capital. And then there are the natives, men like Joseph Samson, who was adopted by a prominent Americo family and later presided over the execution of his foster father during the 1980 coup. In making Liberia, the Americoes transplanted the virtues and vices of their country of birth. The inspiring and troubled history they created is, to a remarkable degree, the mirror image of our own.

THE CLASSIC NATIONAL BESTSELLER "A wonderful, splendid book—a book that should be read by every American, student or otherwise, who wants to understand his country, its true history, and its hope for the future." —Howard Fast Historian Howard Zinn's *A People's History of the United States* chronicles American history from the bottom up, throwing out the official narrative taught in schools—with its emphasis on great men in high places—to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, it is the only volume to tell America's story from the point of view of—and in the words of—America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As Zinn shows, many of our country's greatest battles—the fights for a fair wage, an eight-hour workday, child-labor laws, health and

safety standards, universal suffrage, women's rights, racial equality—were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, *A People's History of the United States* features insightful analysis of the most important events in our history. This edition also includes an introduction by Anthony Arnove, who wrote, directed, and produced *The People Speak* with Zinn and who coauthored, with Zinn, *Voices of a People's History of the United States*.

In the fifty years since it was published, *The Other America* has been established as a seminal work of sociology. This anniversary edition includes Michael Harrington's essays on poverty in the 1970s and '80s as well as a new introduction by Harrington's biographer, Maurice Isserman. This illuminating, profoundly moving classic is still all too relevant for today's America. When Michael Harrington's masterpiece, *The Other America*, was first published in 1962, it was hailed as an explosive work and became a galvanizing force for the war on poverty. Harrington shed light on the lives of the poor—from farm to city—and the social forces that relegated them to their difficult situations. He was determined to make poverty in the United States visible and his observations and analyses have had a profound effect on our country, radically changing how we view the poor and the policies we employ to help them.

A wide-ranging work that explores two centuries of Caribbean literature from a comparative perspective. While haunted by the need to establish cultural difference and authenticity, Caribbean thought is inherently modernist in its recognition of the interplay between cultures, brought about by centuries of contact, domination, and consent.

Learn why it is imperative to bring a progressive focus back to social welfare policy! This vital book explores recent research on poverty and inequality, identifies strategies for ensuring adequate services, and challenges many of the inaccurate beliefs that were used to justify welfare reform legislation in 1996. You'll find up-to-date information on various marginalized groups and their social problems, including lack of health coverage for women with mental health, substance abuse, and domestic violence problems. In addition, you'll find data on the health coverage situation for the poor, for Appalachians, and for women in general. Finally, *Rediscovering the Other America: The Continuing Crisis of Poverty and Inequality in the United States* suggests strategies for changing public perceptions about the nature of poverty and the poor. From the editors: "In 1962, Michael Harrington published *The Other America*, which documented how deeply entrenched poverty and inequality were in one of the wealthiest countries in the world. Four decades later, we find it necessary once again to rediscover this profound social condition. The purpose of this book is to awaken policymakers and the public to this situation once again, in order to affect the nature of public policies dealing with these issues." *Rediscovering the Other America: The Continuing Crisis of Poverty and Inequality in the United States* covers a wide range of issues, some similar to what Harrington described in 1962 and some reflecting recent social, political, and economic developments. Specifically, the book addresses: providing health care coverage for the poor why poverty persisted during the economic boom of the Clinton presidency politicians' views and beliefs regarding poverty, welfare, and welfare recipients the impact of the 1996 welfare reform legislation on the nonprofit sector economic differences between women and men poverty in Appalachia the impact of welfare reform on those who receive public assistance

This book illuminates the evolution of Quaker war tax resistance in America, as told by those who resisted and those who debated the limits of the Quaker peace testimony where it applied to taxpaying. Makes recommendations for meeting four major challenges currently facing the United States, including globalization, the information technology revolution, chronic deficits, and unbalanced energy consumption.

Recent research on inequality and poverty has shown that those born into low-income families, especially African Americans, still have difficulty entering the middle class, in part because of the disadvantages they experience living in more dangerous neighborhoods, going to inferior public schools, and persistent racial inequality. *Coming of Age in the Other America* shows that despite overwhelming odds, some disadvantaged urban youth do achieve upward mobility. Drawing from ten years of fieldwork with parents and children who resided in Baltimore public housing, sociologists Stefanie DeLuca, Susan Clampet-Lundquist, and Kathryn Edin highlight the remarkable resiliency of some of the youth who hailed from the nation's poorest neighborhoods and show how the right public policies might help break the cycle of disadvantage. *Coming of Age in the Other America* illuminates the

profound effects of neighborhoods on impoverished families. The authors conducted in-depth interviews and fieldwork with 150 young adults, and found that those who had been able to move to better neighborhoods—either as part of the Moving to Opportunity program or by other means—achieved much higher rates of high school completion and college enrollment than their parents. About half the youth surveyed reported being motivated by an “identity project”—or a strong passion such as music, art, or a dream job—to finish school and build a career. Yet the authors also found troubling evidence that some of the most promising young adults often fell short of their goals and remained mired in poverty. Factors such as neighborhood violence and family trauma put these youth on expedited paths to adulthood, forcing them to shorten or end their schooling and find jobs much earlier than their middle-class counterparts. Weak labor markets and subpar postsecondary educational institutions, including exploitative for-profit trade schools and under-funded community colleges, saddle some young adults with debt and trap them in low-wage jobs. A third of the youth surveyed—particularly those who had not developed identity projects—were neither employed nor in school. To address these barriers to success, the authors recommend initiatives that help transform poor neighborhoods and provide institutional support for the identity projects that motivate youth to stay in school. They propose increased regulation of for-profit schools and increased college resources for low-income high school students. *Coming of Age in the Other America* presents a sensitive, nuanced account of how a generation of ambitious but underprivileged young Baltimoreans has struggled to succeed. It both challenges long-held myths about inner-city youth and shows how the process of “social reproduction”—where children end up stuck in the same place as their parents—is far from inevitable.

A passionate call to action for improving education of children in poverty

Chris Crass calls on all of us to join our values to the power of love and act with courage for a world where Black lives truly matter. A world where the death culture of white supremacy no longer devours the lives of Black people and no longer deforms the hearts and souls of white people. In addition to his own soul-searching essays and practical organizing advice in his "notes to activists," Chris Crass lifts up the voices of longtime white anti-racist leaders organizing in white communities for Black Lives Matter. Crass has collected lessons and vibrant examples of this work from rural working class communities in Kentucky and Maine, mass direct action in Wisconsin and New York, faith-based efforts among Jewish communities, Unitarian Universalists, and the United Church of Christ, and national efforts like Showing Up for Racial Justice (SURJ) and Jewish Voice for Peace. "

Challenging populist views about the white working class in the US, this book showcases what they really think about the defining issues in today's America. As the 2020 presidential elections draw near, this is an invaluable insight into the complex views on 2016 election candidates, race, identity and cross-racial connections.

Shortly before his assassination, Martin Luther King Jr. called for a radical redistribution of economic and political power to transform the whole of society. In 1967, he envisioned and designed the Poor People's Campaign, an interracial effort that was carried out after his death. This campaign brought together impoverished Americans of all races to demand

better wages, better jobs, better homes, and better education. King and the Other America explores this overlooked and obscured episode of the late civil rights movement, deepening our understanding of King's commitment to social justice and also of the long-term trajectory of the civil rights movement. Digging into earlier radical arguments about economic inequality across America, which King drew on throughout his entire political and religious life, Sylvie Laurent argues that the Poor People's Campaign was the logical culmination of King's influences and ideas, which have had lasting impact on young activists and the public. Fifty years later, growing inequality and grinding poverty in the United States have spurred new efforts to rejuvenate the campaign. This book draws the connections between King's perceptive thoughts on substantive justice and the ongoing quest for equality for all.

The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not." In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people's lives and behavior and the nation's fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball's Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems

in America to plan their out-cast of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Beautifully written, original, and revealing, *Caste: The Origins of Our Discontents* is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.

On a brilliant day in May, in the year 1868, a gentleman was reclining at his ease on the great circular divan which at that period occupied the centre of the Salon Carre, in the Museum of the Louvre. This commodious ottoman has since been removed, to the extreme regret of all weak-kneed lovers of the fine arts, but the gentleman in question had taken serene possession of its softest spot, and, with his head thrown back and his legs outstretched, was staring at Murillo's beautiful moon-borne Madonna in profound enjoyment of his posture. He had removed his hat, and flung down beside him a little red guide-book and an opera-glass. The day was warm; he was heated with walking, and he repeatedly passed his handkerchief over his forehead, with a somewhat wearied gesture. And yet he was evidently not a man to whom fatigue was familiar; long, lean, and muscular, he suggested the sort of vigor that is commonly known as "toughness." But his exertions on this particular day had been of an unwonted sort, and he had performed great physical feats which left him less jaded than his tranquil stroll through the Louvre. He had looked out all the pictures to which an asterisk was affixed in those formidable pages of fine print in his Badeker; his attention had been strained and his eyes dazzled, and he had sat down with an aesthetic headache.
