This volume celebrates the twentieth anniversary of CLEF - the Cross-Language Evaluation Forum for the first ten years, and the Conference and Labs of the Evaluation Forum since – and traces its evolution over these first two decades. CLEF's main mission is to promote research, innovation and development of information retrieval (IR) systems by anticipating trends in information management in order to stimulate advances in the field of IR system

experimentation and evaluation. The book is divided into six parts. Parts I and II provide background and context, with the first part explaining what is meant by experimental evaluation and the underlying theory, and describing how this has been interpreted in CLEF and in other internationally recognized evaluation initiatives. Part II presents research architectures and infrastructures that have been developed to manage experimental data and to provide evaluation services in CLEF and elsewhere. Parts III, IV and V represent the core of the book, presenting some of the most significant evaluation activities in CLEF, ranging from the early multilingual text processing exercises to the later, more sophisticated experiments on multimodal collections in diverse genres and media. In all cases, the focus is not only on describing “what has been achieved”, but above all on “what has been learnt”. The final part examines the impact CLEF has had on the research world and discusses current and future challenges, both academic and industrial, including the relevance of IR benchmarking in industrial settings. Mainly intended for researchers in academia and industry, it also offers useful insights and tips for practitioners in industry working on the evaluation and performance issues of IR tools, and graduate students specializing in information retrieval.

The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL classrooms, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia-Pacific in global times, bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the Asia-Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the nature, purpose and importance of literature education in global times.
