Remember that monster on the wing of the airplane? William Shatner saw it on The Twilight Zone, John Lithgow saw it in the movie-even Bart Simpson saw it. "Nightmare at 20,000 Feet" is just one of many classic horror stories by Richard Matheson that have insinuated themselves into our collective imagination. Here are more than twenty of Matheson's most memorable tales of fear and paranoia, including: "Duel," the nail-biting tale of man versus machines that inspired Steven Spielberg's first film; "Prey," in which a terrified woman is stalked by a malevolent Tiki doll, as chillingly captured in yet another legendary TV moment; "Blood Son," a disturbing portrait of a strange little boy who dreams of being a vampire; "Dress of White Silk," a seductively sinister tale of evil and innocence. Personally selected by Richard Matheson, the bestselling author of I Am Legend and What Dreams May Come, these and many other stories, more than demonstrate why he is rightfully regarded as one of the finest and most influential horror writers of our generation. This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Unmasks the tough, street-smart persona of Charles Bukowski—America's "Ultimate Outsider" Amazing letters filled with passionate, literary, and personal observation Insights into the author of Tales of Ordinary Madness, Notes of a Dirty Old Man, and Run with the Hunted Insights into Sheri Martinelli: the protege of Anais Nin, an accomplished painter, and the mistress of Ezra Pound Charels Bukowski's persona as the Dirty Old Man of American Literature is just that: a persona, a mask beneath which there was a man better read and more cultured than most people realize. Sheri Martinelli was one of the favored few for whom Bukowski dropped the mask and engaged in serious discussion of literature and art, and for that reason the discovery and publication of his letters to her give us a more complete picture of this complicated man.
