The Raven: six men and an elf, sword for hire in the wars that have torn apart Balaia. For years their loyalty has been only to themselves and their code. But, that time is over. The Wytch Lords have escaped and The Raven find themselves fighting for the Dark College of magic, searching for the location of Dawnthief. It is a spell created to end the world, and it must be cast if any of them are to survive. Dawnthief is a fast paced epic about a band of all-too-human heroes. From the Trade Paperback edition.

Comprehensive in scope and contemporary in coverage, this text explores modern digital and data communications systems, microwave radio communications systems, satellite communications systems, and optical fiber communications systems.

Thinking Critically About Ethical Issues encourages students to reason out for themselves the best answers to moral problems, rather than providing neat answers for students to swallow and regurgitate. Striking a balance between the theoretical and the practical, Ruggiero's text discusses the history of ethics, but its focus is on doing ethics to promote the development of critical thinking skills and to help students acquire confidence in their own judgement. The short chapter length allows students to spend less time reading and more time doing ethical analysis.

AMAZELAND is a story book which would help children appreciate and value the existence of variance in the world. The book uses images to recount the conversation of four different characters who are meant to go for a race with lace less snickers and end up in a discussion about the beauty in having different people, different nations, different leaf types, different seasons, and different shades of colour. After a read, one is sure to understand that difference is good, and children are sure to know the different seasons, colours, simple leaf types, and the flags of different to which they may belong. We may be different, but our strive is to belong.

Each year a billion dollars is spent on church buildings in the United States. Yet there is no authoritative book available to guide building committees, ministers, and others responsible for new churches in the theological implications of their work. Dr. White explores the theological and historical considerations relevant to building for Protestant worship. Surprisingly, these are often ignored by building committees, usually with disastrous results. His approach is highly original, especially in his theological treatment of worship; yet his book is also a operative in the largest sense, in that it relates theology to practice. Professor White begins with a critical analysis of contemporary concepts of Protestant worship and then defines the liturgical factors in church design. Following this, there are four chapters giving an historical account of various experiments from the third century to the present. This section indicates the tremendous variety of possibilities open to the church builder, many of which have been ignored too long. A final chapter deals with emotive factors - all vitally relevant to the architect: choir, liturgical art, and style. The opportunity to design a new church building occurs only once or twice in each generation of church members. It is all the more important that it be done carefully since the building will continue to affect the life of the congregation for many years. Until fundamental questions as to what the Church is and what the Church does in worship are raised, a congregation is not prepared to build. This book will help churches find the answers. The 155-item bibliography should be of value to many since a recent extensive bibliography on Protestant church architecture does not exist. This book also contains 60 diagrams of experiments in plan garnered

from nearly 2000 years of history.

Becoming a Language Teacher, by respected author and experienced language teacher Elaine K. Horwitz, gives pre- and in-service teachers the skills they need to meet the needs of all language learners in today's diverse classrooms-while encouraging them to develop a personal approach to language teaching. Using a warm, supportive tone, the author clearly explains the fundamental concepts of second language acquisition and language teaching. A much-needed resource at a time when it is critical for all mainstream teachers to focus on language, this guide describes how to develop language for academic needs as well as for communication purpose and addresses the latest trends in language teaching.

This cookbook contains recipe after recipe that allow you to harness the full power of the native plug-in effects in the After Effects application. In a step-by-step manner, author Chad Perkins guides you through the creation and application of each and every native plug-in effect available for use in the AE toolset. The book also shows you how each can be used optimally in your media project, when and why it makes sense to use each, and also how to combine multiple effects. From color correction effects to distortion effects to stimulation effects and all in between, this book puts the full power of the AE plug-in effects in your hands. It shows you how to create, among others: - the shatter effect - the fractal noise effect - the glow effects - the Particle playground effect - the 3D Channel Extract effect - the Colorama effect
