"Never before, the entire history of the American theater, has so much of the truth of black people's lives been seen on the stage," observed James Baldwin shortly before *A Raisin in the Sun* opened on Broadway in 1959. Indeed Lorraine Hansberry's award-winning drama about the hopes and aspirations of a struggling, working-class family living on the South Side of Chicago connected profoundly with the psyche of black America--and changed American theater forever. The play's title comes from a line in Langston Hughes's poem "Harlem," which warns that a dream deferred might "dry up/like a raisin in the sun." "The events of every passing year add resonance to *A Raisin in the Sun*," said *The New York Times*. "It is as if history is conspiring to make the play a classic." This Modern Library edition presents the fully restored, uncut version of Hansberry's landmark work with an introduction by Robert Nemiroff.

Studies have shown that 90% of all online businesses fail within the first four months of starting. This is a pretty disheartening statistic, right? If you want to do everything in your power to be among the 10% who succeed, keep reading... THIS IS NOT A DICTIONARY. If that's what you're looking for, I urge you to save your money and not buy this book. Now...congratulations. With the click of a finger, you've implanted a thought into your subconscious mind that you won't ever let yourself be part of the majority that fail, part of those stuck in the hamster wheel. You've let yourself know that you're determined to execute your business plans. You've probably heard the saying 'knowledge is power'. Right? Wrong! Applied knowledge is power. Knowledge is only as powerful as the holder, just as a blade is only as dangerous as the one who wields it. Many aspiring entrepreneurs end up spending money on 'educating themselves' buying books, high ticket online courses, and going to seminars but never actually apply what they learn. Some don't even educate themselves at all. This is a disaster waiting to happen. Success will not come. Just like most entrepreneurs, I didn't go to university to study business. During my early years forming my start-up businesses, I struggled immensely with fully understanding business lingo and key terminology. There's nothing more embarrassing than not knowing key business terminology, not being able to express yourself professionally in business meetings or negotiations, not knowing the correct language to use at crucial turning points and still thinking you're a 'business owner'. I sought understanding and the appropriate knowledge needed to become a professional. I took business very seriously; if I wanted to be successful, I would need all the advantages I could get. I wanted to fix my intellectual blind spots, as I knew this was an advantage my competitors had over me. As an entrepreneur, we are problem solvers, right? So, I slowly built a mind map of all the business phrases that kept creeping up in conversations, meetings, podcasts and online courses. Business Vocabulary will enable you to...
