Using strategic plans, intelligence analysis, and other materials that have only recently been declassified, *Emergency War Plan* examines the theory and practice of nuclear deterrence during the 1945-1960 period of the Cold War.

In 1944 the U.S. Army published this manual for its officers in the Pacific Theater an expanded version of the original 1942 manual of the same name—and ever since, it has been the best single reference source on the wartime Japanese military available in the English language. By 1944, the army had had time to assess its enemy closely and was coming to understand him, and its vast knowledge was distilled into the handbook. The

handbook details the Japanese military system, field organization, tactics, and weapons and equipment, and the strengths and weaknesses that resulted from them. Extensively illustrated, it contains sections on the Japanese special forces, the military police, uniforms and insignia, and conventional signs and abbreviations. It covers, besides the army, the Japanese Air Service, with emphasis on its tactics and organization. Issued to officers for briefings and periodically updated, the handbook's purpose was to assist in the winning of the war, and thus it strove to be absolutely reliable for its users in combat. It was compiled by a team of officers who integrated the research of others, and it contains information provided by the U.S. Marines and also by British and Australian intelligence. Packed with information, it is a major primary source that military historians and World War II buffs will find fascinating.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The last decade has witnessed the rise of big data in game development as the increasing proliferation of Internet-enabled gaming devices has made it easier than ever before to collect large amounts of player-related data. At the same time, the emergence of new business

models and the diversification of the player base have exposed a broader potential audience, which attaches great importance to being able to tailor game experiences to a wide range of preferences and skill levels. This, in turn, has led to a growing interest in data mining techniques, as they offer new opportunities for deriving actionable insights to inform game design, to ensure customer satisfaction, to maximize revenues, and to drive technical innovation. By now, data mining and analytics have become vital components of game development. The amount of work being done in this area nowadays makes this an ideal time to put together a book on this subject. *Data Analytics Applications in Gaming and Entertainment* seeks to provide a cross section of current data analytics applications in game production. It is intended as a companion for practitioners, academic researchers, and students seeking knowledge on the latest practices in game data mining. The chapters have been chosen in such a way as to cover a wide range of topics and to provide readers with a glimpse at the variety of applications of data mining in gaming. A total of 25 authors from industry and academia have contributed 12 chapters covering topics such as player profiling, approaches for analyzing player communities and their social structures, matchmaking, churn prediction and customer lifetime value estimation, communication of analytical results, and visual approaches to game analytics. This book's perspectives and concepts will spark heightened interest in game analytics and foment innovative ideas that will advance the exciting field of online gaming and entertainment.

Airplane Stories and Histories chronicles two hundred years of aviation highlights including the exploits of pioneers such as Sir George Cayley, the Wright brothers, Charles Lindbergh, Wiley Post, Amelia Earheart, R. J. Mitchell, Sir Geoffrey de Havilland, Allan Loughead, Frank Whittle, and Kelly Johnson. Notable events and developments are discussed, such as the first flight, first transatlantic flight, first around-the-world flight, the jet engine, Spitfire, Mustang, Mosquito, Comet, Concorde, Boeing 747, C-5 Galaxy, Avro Arrow, C-130 Hercules, and the advent of unmanned vehicles (drones). An extensive bibliography is provided for those who wish to explore subjects at greater depth.

In this engaging book, Jeremy Black argues that technology neither acts as an independent variable nor operates without major limitations. This includes its capacity to obtain end results, as technology's impact is far from simple and its pathways are by no means clear. After considering such key conceptual points, Black discusses important technological advances in weaponry and power projection from sailing warships to aircraft carriers, muskets to tanks, balloons to

unmanned drones in each case, taking into account what difference these advances made. He addresses not only firepower but also power projection and technologies of logistics, command, and control. Examining military technologies in their historical context and the present centered on the Revolution in Military Affairs and Military Transformation, Black then forecasts possible future trends. Planetary Solidarity brings together leading Latina, womanist, Asian American, Anglican American, South American, Asian, European, and African woman theologians on the issues of doctrine, women, and climate justice. Because women make up the majority of the world's poor and tend to be more dependent on natural resources for their livelihoods and survival, they are more vulnerable when it comes to climate-related changes and catastrophes. Representing a subfield of feminist theology that uses doctrine as interlocutor, this book asks how Christian doctrine might address the interconnected suffering of women and the earth in an age of climate change. While doctrine has often stifled change, it also forms the thread that weaves Christian communities together. Drawing on postcolonial ecofeminist/womanist analysis and representing different ecclesial and denominational traditions, contributors use doctrine to envision possibilities for a deep solidarity with the earth and one another while addressing the intersection of gender, race, class, and ethnicity. The book is organized around

the following doctrines: creation, the triune God, anthropology, sin, incarnation, redemption, the Holy Spirit, ecclesiology, and eschatology.

When the B-52 Stratofortress entered operational service with the US Air Force in 1955, work was already underway on defining its successor. The B-70 Valkyrie, a Mach 3 jet bomber, was one option. Although two XB-70A prototypes flew, the B-70 never went into production. Out of the subsequent Advanced Manned Strategic Aircraft program came the B-1A bomber, which flew at high speed and low altitude to evade enemy air defenses. The B-1A was cancelled in favor of fitting the B-52 with cruise missiles. The B-1, known as the BONE, was revived in 1981 as the improved B-1B to boost American military power and be a symbol of American strength at the peak of Cold War tensions. The B-1B entered service in 1986 with several deficiencies. The resolution of most of these issues coincided with the end of the Cold War. After the Cold War, the B-1B lost its primary nuclear mission but remained relevant by transforming into a high-speed,

long-range, high-payload delivery platform for conventional precision-guided munitions. The first combat use of the B-1B was in 1998 in Iraq. The BONE has proved a highly effective combat aircraft in Afghanistan, Iraq, Libya, Syria and the former Yugoslavia. This superbly researched and illustrated book traces the BONE's long development and operational history in fascinating detail.

The human spirit is at the heart of Conservatism. Conservatives have become a marginalized and misunderstood demographic in our pop-political culture. They are not as they are often portrayed: greedy, racists, sexist, homophobic and violent. Rather, they believe in equality, opportunity, accountability, freedom and independence. Harvard graduate Pillinger Choi, a first generation daughter of a Korean mother and a Jewish father, presents conservative views on social, fiscal and foreign policy issues from a modest and compassionate perspective.

Bleeding Heart Conservatives will invigorate jaded conservatives, closet conservatives, and conservatives-turned-libertarian/independent, as well as enlighten curious apoliticals and liberals.

In many ways, the Heinkel He 177 'Greif' (Griffon) was Nazi Germany's 'lost' strategic bomber. With some fundamental creases ironed out, and built in large numbers, the He 177 would have offered the Luftwaffe the means with which to carry out long-range, mass bombing attacks against targets of a strategic nature. Although competing interests and personalities served to prevent this from happening, from mid-1943 the aircraft nevertheless saw service over England, the Atlantic, the Mediterranean and in Russia. The He 177 flew to the end of the war, with some machines undertaking extremely hazardous low-level missions against Soviet armour in Poland in late 1944-45. This fascinating book, filled with detailed artwork and contemporary photographs, tells the story of this aircraft, including the political infighting at the top of the Luftwaffe's hierarchy that stymied its development, its radical technical design and its state-of-the-art weaponry.

WHAT WOULD YOU DO TO SURVIVE? What sacrifices would you endure for a better life? Would you swim a vast river? Would you trek across a desert or float through a malarial rainforest? How about breaking out of a slave plantation? Boarding a leaky ship? Escaping a siege? Outlanders is a compilation of ten real-life stories from refugees and asylum seekers, whom the author met while working in the field of refugee resettlement in the US and Ireland. They are old people and young, recently arrived and well established, originating from Afghanistan, Burma, Laos, Somalia, Iraq, South Africa, Bosnia and Palestine. Outlanders is the

first work of its kind to explore the subject from a creative perspective, setting it apart from previous journalistic work available on the subject. The stories are presented in a style that immerses the reader in the journey of the refugee, the sights, smells, sounds they experienced, how it felt along the way. These unique individual narratives are bound together by recurring themes: daily life, the eruption of conflict and the privations endured to escape it. Outlanders offers a glimpse into the lives of the displaced, not through screen or newsfeed, but through the very eyes of those who survived.
