The health care system in Canada is much-touted in the international sphere, but often overlooked when it comes to an examination of its actual administration and regulation. Health Systems in Transition: Canada provides an objective description and analysis of the public, private, and mixed components that make up health care in Canada today. Published in co-operation with the World Health Organization Regional Office for Europe on behalf of the European Observatory on Health Systems and Policies, Gregory P. Marchildon's study offers a statistical and visual description of the many facets of Canadian health care financing, administration, and service delivery. This study's most distinctive feature is a comparative description and analysis. For international comparison, five other countries have been selected: The United States, Australia, the United Kingdom, France, and Sweden. Because public health care administration and delivery is highly decentralized in Canada, Marchildon also analyzes the important health status and health care features within Canada by province and territory, and describes in some detail the unique

constitutional, jurisdictional, and financial features of the Canadian system. Balancing careful assessment, summary, and illustration, *Health Systems in Transition: Canada* is a thorough and illuminating look at one of the nation's most complex institutions.

The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in

which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts. This is an indispensable companion to the 'Sunflower book' – the highly acclaimed Illustrated Textbook of Paediatrics (6th Edition). It is essential for those who wish to test or improve their learning, or for exam revision for undergraduate or early postgraduate speciality exams. It includes high quality questions, some including images or diagrams, on important topics covering the paediatrics and child health curriculum. Explanations about both correct and incorrect answers are provided. The authors are highly experienced examiners and question writers, ensuring that the questions are similar to those encountered in exams or help explain difficult topics. Over 250 Single Best Answer questions Over 200 question stems for Extended Matching questions Explanations provided not only of the correct but also of incorrect answers Clinical photographs included to ask questions about clinical signs

The book is targeted at the candidates appearing for the MRCOG Part 2, which is a compulsory examination for postgraduate trainees in the UK who aspire to pursue a career in obstetrics and gynaecology. Apart from the UK postgraduates, MRCOG examination is taken by postgraduates all across the globe to obtain this prestigious degree. The examination is carried out twice a year, and the venues are London, Manchester, Glasgow and Belfast in the UK. The examination also takes place in Bangladesh, Egypt, Hong Kong, India (2 centres), Iraq, Jordan, Malaysia, Pakistan, Saudi Arabia, Sudan, Dubai and Jamaica. At each centre, the number of candidates participating varies between 5 and 200. Apart from the candidates appearing for this examination, this book would be helpful for the assessment of knowledge in all postgraduate trainees in obstetrics and gynaecology worldwide. Therefore, this book has a wide target group. A unique characteristic of this book is that it produces a comprehensive set of both types of questions covering all the modules of the MRCOG Part 2 syllabus ([www.rcog.org.uk](http://www.rcog.org.uk)). A broad range of reading material has been used to develop the EMQs and SBAs including RCOG Greentop Guidelines, Scientific Impact Papers, Clinical Governance Papers and RCOG Consent Advice. In addition to the RCOG revision material, the authors have included questions from The Obstetrician & Gynaecologist (TOG), NICE Guidelines, StratOG and recommended textbooks. The authors have experience in MRCOG examination question writing, and Sharmistha Guha has been a co-lead for the London SBA Writing Group for the RCOG. The questions have been written to the same standard as the RCOG question bank. Mr. Gregory Ward, who is the Head of London Specialty School of Obstetrics and Gynaecology, wrote the foreword of the book. He is a senior clinician, a RCOG examiner and member of the RCOG SBA committee. He has provided guidance

continually to ensure the quality of the questions is up to the standard of RCOG. It is important to recognize that this book is not a textbook and should not be used as the sole reading material for the examination. However, the questions will be especially useful in gaining valuable examination practice. An explanation has been provided for all of the questions along with references to aid in the preparation. A reading guide has been provided for assistance. The authors hope that this will be a useful tool in preparation for this crucial examination.

Registered Dietitian Exam Practice Questions are the simplest way to prepare for the Registered Dietitian test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Our Registered Dietitian Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our Registered Dietitian Exam Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

The X-Ray Technician Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study.
