The new playbook for innovation and startup success is emerging from beyond Silicon Valley--at the "frontier." Startups have changed the world. In the United States, many startups, such as Tesla, Apple, and Amazon, have become household names. The economic value of startups has doubled since 1992 and is projected to double again in the next fifteen years. For decades, the hot center of this phenomenon has been Silicon Valley. This is changing fast. Thanks to technology, startups are now taking root everywhere, from Delhi to Detroit to Nairobi to Sao Paulo. Yet despite this globalization of startup activity, our knowledge of how to build successful startups is still drawn primarily from Silicon Valley. As venture capitalist Alexandre Lazarow shows in this insightful and instructive book, this Silicon Valley "gospel" is due for a refresh--and it comes from what he calls the "frontier," the growing constellation of startup ecosystems, outside of the Valley and other major economic centers, that now stretches across the globe. The frontier is a truly different world where startups often must cope with political or economic instability and lack of infrastructure, and where there might be little or no access to angel investors, venture capitalists, or experienced employee pools. Under such conditions, entrepreneurs must be creators who build industries rather than disruptors who change them because there are few existing businesses to disrupt. The companies they create must be global from birth because local markets are too small. They focus on resiliency and sustainability rather than unicorn-style growth at any cost. With rich and wide-ranging stories of frontier innovators from around the world, Out-Innovate is the new playbook for innovation--wherever it has the potential to happen.

Think you need a patent? Think again. Many of the products Stephen Key has licensed required no intellectual property protection whatsoever, yet have made millions in royalties. But Key also knows what it takes to protect a big idea. Years ago, after reading about how medication bottles rarely contain enough space for the information that needs to be printed on them, he was inspired to develop an innovative label technology. The Spinformation rotating label has been licensed on products the world over, is protected by 20 U.S. and international patents, and has received more than 13 industry awards. To put it simply: Key knows how to use intellectual property to profit. This book will teach you how to:

- Get a licensing contract with or without intellectual property
- Write a provisional patent application that stops others from stealing your idea
- Find and hire a killer patent attorney (they are not all created equal!)
- Save thousands of dollars on legal expenses
- File patents that have true value
- Negotiate a win-win agreement

It also details Stephen's experience defending his patents in Federal Court—a David versus Goliath saga he has never before written about at length—as well as provides tips about how to avoid a licensing contract from going bad.

Too many organizations are overlooking, or even suppressing, their single most powerful source of growth and innovation. And it's right under their noses. The frontline employees who interact directly with your customers, make your products, and provide your services have unparalleled insights into where problems exist and what improvements and new offerings would have the most impact. In this follow-up to their bestseller *Ideas Are Free*, Alan G. Robinson and Dean M. Schroeder show how to align every part of an organization around generating and implementing employee ideas and offer dozens of examples of what a tremendous competitive advantage this can offer. Their advice will enable leaders to build organizations capable of implementing 20, 50, or even 100 ideas per employee per year. Citing organizations from around the world, they explain what's needed to put together a management team that can lead the type of organization that embraces grassroots ideas and describe the strategies, policies, and practices that enable them. They detail exactly how high-performing idea processes work and how to design one for your organization. There's constant pressure today to do more with less. But cutting wages and benefits and pushing people to work harder with fewer resources can go only so far. Ironically, the best solution resides with the very people who have been bearing the brunt of these measures. With Robinson and Schroeder's advice, you can unleash a constant stream of great ideas that will strengthen every facet of your organization.

HOW DO I TRANSFORM MY LIFE? The answer is simple: come up with ten ideas a day. It doesn't matter if they are good or bad the key is to exercise your 'idea muscle', to keep it toned, and in great shape. People say ideas are cheap and execution is everything but that is NOT true. Execution is a consequence, a subset of good, brilliant idea. And good ideas require daily work. Ideas may be easy if we are only coming up with one or two but if you open this book to any of the pages and try to produce more than three, you will feel a burn, scratch your head, and you will be sweating, and working hard. There is a turning point when you reach idea number 6 for the day, you still have four to go, and your mind muscle is getting a workout. By the time you list those last ideas to make it to ten you will see for yourself what "sweating the idea muscle" means. As you practice the daily idea generation you become an idea machine. When we become idea machines we are flooded with lots of bad ideas but also with some that are very good. This happens by the sheer force of the number, because we are coming up with 3,650 ideas per year (at ten a day). When you are inspired by an

extraordinary idea, all of your thoughts break their chains, you go beyond limitations and your capacity to act expands in every direction. Forces and abilities you did not know you had come to the surface, and you realize you are capable of doing great things. As you practice with the suggested prompts in this book your ideas will get better, you will be a source of great insight for others, people will find you magnetic, and they will want to hang out with you because you have so much to offer. When you practice every day your life will transform, in no more than 180 days, because it has no other evolutionary choice. Life changes for the better when we become the source of positive, insightful, and helpful ideas. Don't believe a word I say. Instead, challenge yourself to try it for the 180 days and see your life transform, in magical ways, in front of your very eyes.

But 90% of new businesses fail, because their founders failed to ask themselves the simplest of questions. I can save you years of wasted time and thousands of pounds of wasted money by giving you the ammunition to ask the right questions, and helping you make the decision that is right for you. I will show you how to spend a maximum of seven days deciding if your idea is workable and bankable. How to say 'I'm in', but equally importantly, to have the courage to say 'I'm out'. How to become your own Dragon. Each piece of advice in this book is based on my thirty years of starting businesses. You will find all the fundamental ingredients for any new company, whatever sector you want to be in, whatever size of business you have in mind, along with the tools to make it work. Answer all the tough questions I am going to get you to ask yourself and you will have a business that genuinely has a chance of success. You can be one of the 10% of businesses that do make it.' - James Caan. James Caan is one of the UK's most successful and dynamic entrepreneurs, having built and sold businesses since 1985. After dropping out of school at sixteen and starting his first business in a Pall Mall broom cupboard - armed with little more than charm and his father's advice - Caan went on to make his fortune in the recruitment industry, founding the Alexander Mann Group, a company with a turnover of £130m. A 2003 graduate of Harvard Business School, Caan's most recent endeavour has been to set up private equity firm Hamilton Bradshaw. Caan hit our screens when he joined the panel of the BBC's Dragons' Den in 2007.
