The remarkable story of rising to the top of the music charts, a second act as a tech pioneer, and the sustaining power of creativity and art. Thomas Dolby's hit songs "She Blinded Me with Science" and "Hyperactive!" catapulted him to international fame in the early 80's. A pioneer of New Wave and Electronica, Thomas combined a love for invention with a passion for music, and the result was a new sound that defined an era of revolutionary music. But as record company politics overshadow the joy of performing, Thomas finds a surprising second act. Starting out in a rat-infested London bedsit, a teenage Thomas Dolby stacks boxes by day at the

grocery and tinkers with a homemade synthesizer at night while catching the Police at a local dive bar, swinging by the pub to see the unknown Elvis Costello and starting the weekend with a Clash show at a small night club. London on the eve of the 1980s is a hotbed for music and culture, and a new sound is beginning to take shape, merging technology with the musical energy of punk rock. Thomas plays keyboards in other bands' shows, and with a bit of luck finds his own style, quickly establishing himself on the scene and recording break out hits that take radio, MTV and dance clubs by storm. The world is now his oyster, and sold out arenas, world tours, even a friendship with Michael Jackson become the fabric of his life. But as the record industry flounders and disillusionment sets in, Thomas turns his attention to Hollywood. Scoring films and computer games eventually leads him to Silicon Valley and a software startup that turns up the volume on the digital music revolution. His company barely survives the dotcom bubble but finally even the mavericks at Apple, Microsoft, Netscape and Nokia see the light. By 2005, two-thirds of the world's mobile phones embed his Beatnik software. Life at the zenith of a tech empire proves to be just as full of big personalities, battling egos and roller-coaster success as his days spent at the top of the charts. THE SPEED OF SOUND is the story of an extraordinary man living an extraordinary life, a single-handed quest to make peace between art and the digital world.

ON 8 MARCH 2014, MALAYSIA AIRLINES FLIGHT 370 TOOK OFF FROM KUALA LUMPUR INTERNATIONAL AIRPORT BOUND FOR BEIJING. LESS THAN AN HOUR AFTER TAKEOFF, SOMEWHERE OVER THE SOUTH CHINA SEA, THE PLANE SIMPLY VANISHED. ONE EYEWITNESS SAW A BURNING PLANE CRASH INTO THE SEA. But confusing radar signals tracked an aircraft taking an erratic course across the Malaysian peninsula, then on to the

Andaman Sea. Did it crash there? Or did it fly on to land safely in disputed lands of Central Asia, or the top-secret CIA 'black site' on Diego Garcia? Data from the Rolls-Royce engines tracked by Inmarsat was said to indicate that it might have ditched in the furthest reaches of the South Indian Ocean. We know more about the surface of the moon than the bottom of the sea there. And the weather and currents are so bad, it may never be found. Convenient? Two years later, the Australians are still searching - at the cost of billions - and have found nothing. But was the search in such a remote place part of a cover-up to distract the world's attention because the US Navy had, in fact, shot the plane down? A huge plane, along with 227 passengers and 12 crew, cannot simply have vanished. The Worldwide Web is a-buzz with conspiracy theories. Was the disappearance of MH370 related to the downing of MH17 over the Ukraine four months later? Some have suggested that it was the same plane... Or is the loss of MH370 more akin to the crash of Germanwings Flight 9525, after deranged pilot Andreas Lubitz deliberately flew the plane into the side of a mountain in the Alps, killing all on board... Since the invention of radio, radar, satellite navigation and the internet, the world has become a smaller place. The answer must be out there. Or, perhaps, hidden within the pages of the secret files...
