Clinical research presents health care providers with information on the natural history and clinical presentations of disease as well as diagnostic and treatment options. In today's healthcare system, patients, physicians, clinicians and family caregivers often lack the sufficient scientific data and evidence they need to determine the best course of treatment for the patients' medical conditions. Initial National Priorities for Comparative Effectiveness Research(CER) is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions. In this 2009 report, the Institute of Medicine's Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER, develops a priority list of research topics, and identifies the necessary requirements to

support a robust and sustainable CER enterprise. As part of the 2009 American Recovery and Reinvestment Act, Congress appropriated \$1.1 billion in federal support of CER, reflecting legislators' belief that better decisions about the use of health care could improve the public's health and reduce the cost of care. The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field.

The text provides interesting facts in an easy-to-remember format with the help of two companions, a pirate skeleton named Skully and his trusty pirate dog, Bean. Dr. Katie Walsh Flanagan presents the Second Edition in three main sections to help facilitate learning in a simple, non-intimidating way. Section I is an introduction to medical terminology and contains principles of word building, body organization, medical abbreviations and therapeutic and diagnostic procedures. Section II is organized by each body system which is presented as an island (for example, the cardiovascular system is represented as Cardio Island). Skully and Bean bring the common prefixes and suffixes with them as they add the unique terms of each body system and create new words related to the chapter. Section III contains appendices for specialized areas that students may be interested in exploring, but are not contained in-depth in any chapter.
