Things fall apart when empires crumble. This time, we think, things will be different. They are not. This time, we are told, we will become great again. We will not. In this new edition of the hugely successful *Rule Britannia*, Danny Dorling and Sally Tomlinson argue that the vote to leave the EU was the last gasp of the old empire working its way out of the British psyche. Fuelled by a misplaced nostalgia, the result was driven by a lack of knowledge of Britain's imperial history, by a profound anxiety about Britain's status today, and by a deeply unrealistic vision of our future.

"An illustrated analytical study, *Words and the First World War* considers the situation at home, at war, and under categories such as race, gender and class to give a many-sided picture of language used during the conflict." He considers language in relation to mediation and authenticity, as well as the limitations and potential of different kinds of verbal communication. Walker also examines: - How language changed, and why changed language was used in communications - Language used at the Front and how the 'language of the war' was commercially exploited on the Home Front - The relationship between language, soldiers and class - The idea of the 'indescribability' of the war and the linguistic codes used to convey the experience 'Languages of the front' became linguistic souvenirs of the war, abandoned by soldiers but taken up by academics, memoir writers and commentators, leaving an indelible mark on the words we use even today.

A fundamental aspect of the conflict between Palestinians and Israelis is the territorial dispute which began long before the State of Israel was established. Analysing the land tenure system in Palestine under the administration of the British Mandate, this book questions whether, and to what extent, the land tenure system in Palestine facilitated Zionist land acquisition. The research uses benchmarks elaborated in the guidelines of the United Nations Human Settlements Programme as its analytical starting point, and looks at the formation and implementation of the land tenure system in Palestine. It goes on to place the penetration of Zionism into the land tenure system within the theoretical context of a colonial-settler framework, employing information from land registry records located at the Jordanian Department of Lands. Providing a political-historical analysis of the land tenure system from the end of Ottoman Rule until the end of the British Mandate, this book will be of interest to scholars and students of Middle Eastern History, Imperial and Colonial History, and Middle Eastern Politics.

In 1844, a young merchant from Shiraz called Sayyid 'Ali-Muhammad declared himself the 'gate' (the Bab) to the Truth and, shortly afterwards, the initiator of a new prophetic cycle. His messianic call attracted a significant following across Iran and Iraq. Regarded as a threat by state and religious authorities, the Babis were subject to intense persecution and the Bab himself was executed in 1850. In this volume, leading scholars of Islam, Baha'i studies and Iranian history come together to examine the life and legacy of the Bab, from his childhood to the founding of the Baha'i faith and beyond.

Among other subjects, they cover the Bab's writings, his Qur'an commentaries, the societal conditions that underlay the Babi upheavals, the works of Babi martyr Tahiri Qurratu'l-'Ayn, and Orientalist Edward Granville Browne's encounters with Babi and Baha'i texts.
