Women Writers of the American West, 1833–1927 recovers the names and works of hundreds of women who wrote about the American West during the nineteenth and early twentieth centuries, some of them long forgotten and others better known novelists, poets, memoirists, and historians such as Willa Cather and Mary Austin Holley. Nina Baym mined literary and cultural histories, anthologies, scholarly essays, catalogs, advertisements, and online resources to debunk critical assumptions that women did not publish about the West as much as they did about other regions. Elucidating a substantial body of nearly 650 books of all kinds by more than 300 writers, Baym reveals how the authors showed women making lives for themselves in the West, how they represented the diverse region, and how they represented themselves. Baym accounts for a wide range of genres and geographies, affirming that the literature of the West was always more than cowboy tales and dime novels. Nor did the West consist of a single landscape, as women living in the expanses of Texas saw a different world from that seen by women in gold rush California. Although many women writers of the American West accepted domestic agendas crucial to the development of families, farms, and businesses, they also found ways to be forceful agents of change, whether by taking on political positions, deriding male arrogance, or, as their voluminous published works show, speaking out when they were expected to be silent. In this concise introduction to cultural anthropology, now in its 4th edition, Lassiter takes a fresh and accessible approach to stimulating student interest in the human experience. He uses timely and engaging examples to showcase the ongoing relevance of anthropology today. He also explores how the anthropological perspective can be applied to real-world problems on the local, regional, and global scale. The 4th edition features updates and clarifications throughout the text, including expanded discussion of evolution, language, fieldwork, gender identities, and belief systems. New "Anthropology Here and Now" sidebars encourage readers to delve deeper into particular subjects and to connect with current and ongoing conversations among working anthropologists. Taken as a whole, the book serves as an ideal text for introductory undergraduate courses.

Magic, sorcery and witchcraft are among the most common themes of the great medieval Icelandic sagas and poems, the problematic yet vital sources that provide our primary textual evidence for the Viking Age that they claim to describe. Yet despite the consistency of this picture, surprisingly little archaeological or historical research has been done to explore what this may really have meant to the men and women of the time. This book examines the evidence for Old Norse sorcery, looking at its meaning and function, practice and practitioners, and the complicated constructions of gender and sexual identity with which these were underpinned. Combining strong elements of eroticism and aggression, sorcery appears as a fundamental domain of women's power, linking them with the gods, the dead and the future. Their battle spells and combat rituals complement the men's physical acts of fighting, in a supernatural empowerment of the Viking way of life. What emerges is a fundamentally new image of the world in which the Vikings understood themselves to move, in which magic and its implications permeated every aspect of a society permanently geared for war. In this fully revised and expanded second edition, Neil Price takes us with him on a tour through the sights and sounds of this undiscovered country, meeting its human and otherworldly inhabitants, including the Sámi with whom the Norse partly shared this mental landscape. On the way we explore Viking notions of the mind and soul, the fluidity of the boundaries that they drew between humans and animals, and the immense variety of their spiritual beliefs. We find magic in the Vikings' bedrooms and on their battlefields, and we meet the sorcerers themselves through their remarkable burials and the tools of their trade. Combining archaeology, history and literary scholarship with extensive studies of Germanic and circumpolar religion, this multi-award-winning book shows us the Vikings as we have never seen them before.

Fragments of ancient belief mingle with folklore and Christian dogma until the original tenets are lost in the myths and psychologies of the intervening years. Hilda Ellis Davidson illustrates how pagan beliefs have been represented and misinterpreted by the Christian tradition, and throws light on the nature of pre-Christian beliefs and how they have been preserved. *The Lost Beliefs of Northern Europe* stresses both the possibilities and the difficulties of investigating the lost religious beliefs of Northern Europe.

With Europe reduced to rubble after the Second World War, Constance must seek knowledge beyond the modern in order to heal her patients—and herself. In Durrell's fourth installment of the *Avignon Quintet*, Constance returns to Europe after the end of World War II. A Freudian analyst, she treats the shell-shocked, the battle-fatigued, and other despairing survivors in Geneva. She also treats the traumatized, autistic son of her former lover, Sebastian—a situation that draws her back into the mysterious cult that the sensitive and charismatic Sebastian led in the deserts of Egypt. In *Sebastian*, Constance's pursuit of wisdom in the midst of Europe's blackest night is rendered as a gorgeous and heartbreaking quest for truth in a world full of illusion.

"J.M.W. Turner (1775-1851) is widely regarded as the greatest painter Britain has ever produced. Despite the many books and exhibitions that have been devoted to him, there is one aspect of his extraordinary oeuvre that has never been thoroughly examined. Uniquely in the history of European art, he took on all comers, past and present, that he considered worthy of a challenge, creating his own images in their styles. These works were both acts of homage and a sophisticated form of art criticism, demonstrating his understanding of great art and his ability to equal or better the most celebrated exponents of the landscape tradition. No artist, however revered, was considered beyond challenge. This unique habit is clearly a key to understanding Turner's art, yet the issue is one that has so far never been thoroughly addressed on Turner and on British art of the 18th and 19th centuries. In *Turner and the Masters* leading authorities explore this fascinating aspect of his career, revealing new detail on the debts and rivalries that shaped his work in often unexpected ways. Accompanying a major touring exhibition that brings together works by Turner with masterpieces by Claude, Canaletto, Ruisdael, Van de Velde, Poussin, Rubens and Rembrandt, as well as by Turner's contemporaries including Constable and Bonington, this book firmly positions Turner in the company of the greatest painters of all time. The contributors include Guillaume Faroult, Sarah Monks, Martin Myrone, Kathleen Nicholson, Philippa

Confucius is one of the most humane, rational, and lucid of moral teachers, concerned not with arcane metaphysics but with practical issues of life and conduct. What is virtue? What sort of life is most conducive to happiness? How should the state be ruled? What is the proper relationship between human beings and their environment? In this classic translation of The Analects by Arthur Waley, the questions Confucius addressed two and a half millennia ago remain as relevant as ever. (Book Jacket Status: Jacketed)

The Bush years have given rise to fears of a resurgent Imperial Presidency, but the problem cannot be solved simply by bringing a new administration to power. Both Left and Right agree on the boundless nature of presidential responsibility. For both sides, it is the president's job to grow the economy, teach our children well, save us from hurricanes, and even to spread democracy abroad. In short, the Imperial Presidency is the price we pay for making the office the focus of our national hopes and dreams. Combining historical scholarship, legal analysis, and cultural commentary, The Cult of the Presidency argues that the presidency needs to be reined in, with its powers checked by Congress and the courts. Only then will we begin to return the presidency to its proper constitutional role.

In a sweeping overview of four centuries of Mongolian history that draws on previously untapped sources, Johan Elverskog opens up totally new perspectives on some of the most urgent questions historians have recently raised about the role of Buddhism in the constitution of the Qing empire. Theoretically informed and strongly comparative in approach, Elverskog's work tells a fascinating and important story that will interest all scholars working at the intersection of religion and politics. —Mark Elliott, Harvard University "Johan Elverskog has rewritten the political and intellectual history of Mongolia from the bottom up, telling a convincing story that clarifies for the first time the revolutions which Mongolian concepts of community, rule, and religion underwent from 1500 to 1900. His account of Qing rule in Mongolia doesn't just tell us what images the Qing emperors wished to project, but also what images the Mongols accepted themselves, and how these changed over the centuries. In the scope of time it covers, the originality of the views advanced, and the accuracy of the scholarship upon which it is based, Our Great Qing seems destined to mark a watershed in Mongolian studies. It will be essential reading for specialists in Mongolian studies and will make an important contribution and riposte to the 'new Qing history' now changing the face of late imperial Chinese history. Specialists in Tibetan Buddhism and Buddhism's interaction with the political realm will also find in this work challenging and thought-provoking."

—Christopher Atwood, Indiana University Although it is generally believed that the Manchus controlled the Mongols through their patronage of Tibetan Buddhism, scant attention has been paid to the Mongol view of the Qing imperial project. In contrast to other accounts of Manchu rule, Our Great Qing focuses not only on what images the metropole wished to project into Mongolia, but also on what images the Mongols acknowledged themselves. Rather than accepting the Manchu's use of Buddhism, Johan Elverskog begins by questioning the static, unhistorical, and hegemonic view of political life implicit in the Buddhist explanation. By stressing instead the fluidity of identity and Buddhist practice as processes continually developing in relation to state formations, this work explores how Qing policies were understood by Mongols and how they came to see themselves as Qing subjects. In his investigation of Mongol society on the eve of the

Manchu conquest, Elverskog reveals the distinctive political theory of decentralization that fostered the civil war among the Mongols. He explains how it was that the Manchu Great Enterprise was not to win over "Mongolia" but was instead to create a unified Mongol community of which the disparate preexisting communities would merely be component parts. A key element fostering this change was the Qing court's promotion of Gelukpa orthodoxy, which not only transformed Mongol historical narratives and rituals but also displaced the earlier vernacular Mongolian Buddhism. Finally, Elverskog demonstrates how this eighteenth-century conception of a Mongol community, ruled by an aristocracy and nourished by a Buddhist emperor, gave way to a pan-Qing solidarity of all Buddhist peoples against Muslims and Christians and to local identities that united for the first time aristocrats with commoners in a new Mongol Buddhist identity on the eve of the twentieth century.
