First published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December) Economic Foundations of Law (2nd ed.) provides an economic analysis of the major areas of the law: property law, torts, contracts, criminal law, civil procedure, corporation law and financial markets, taxation and labor law. In line with current trends in legal scholarship, discussion is focused on economic principles such as risk aversion, efficiency, opportunity cost, moral hazard, rent-seeking behaviour and economies of scale. Accessible, comprehensive and well written, this book uses extensive practical examples and explanations to illustrate key points. There are numerous applications to lawyers and the legal profession, with detailed discussions of subjects as diverse as the proposed market for transplantable human organs, the market for adoptions, the market for bail bonds, the unanticipated effects of Megan's law, and issues of racial profiling. Fully updated and revised, a new chapter on labor law has also been included.

The central goal of this book is to provide a state-of-the-art overview of the literature with respect to the economic analysis of tort law. It sure meets the challenge, offering with great expertise a comprehensive presentation of tort law in both economic and comparative perspectives. The clarity of the text, unusual in the law and economics literature, makes the book accessible to a broad readership of economists with a limited legal background and lawyers with limited economic skills. Olivier Moreteau, Louisiana State University, US Tort Law and Economics, ed. Michael Faure, provides a highly useful economic overview of the most important topics of tort law. The authors clearly show the main developments of the discussion, examining the results of recent studies and stating their own opinions. Detailed bibliographies are included. The volume has to be warmly recommended to friends and foes of economic analysis who are provided with a comprehensive update in this field while also indicating areas which critics have to focus on. Helmut Koziol, European Centre of Tort and Insurance Law, Austria This volume provides a state-of-the-art overview of the literature on the economic analysis of tort law. In sixteen chapters, the specialist authors guide the reader through the often vast literature in each domain providing a balanced and comprehensive summary. Particular attention is paid to the evolution of the field, further refinements to economic models and relevant conclusions and lessons for the policymaker. Tort Law and Economics is part of the Encyclopedia of Law and Economics, and enables readers, some not familiar with law and economics, to obtain an insight in the relevant economic literature concerning tort law and economics. This book will be of interest to lawyers and economists, practitioners and academics interested in accident law, tort law, insurance and regulation. It will also appeal to students in economic analysis of law and policymakers working on prevention of accidents, tort law or compensation of accident victims.

Bauman examines several major themes and arguments in the first decade of critical legal scholarship, predominantly in the U.S. in the period dating roughly from the mid-1970s to the mid-1980s.

This volume is an updated and revised version of the General Course on Public International Law delivered by the Author at The Hague Academy of International Law in 2005. Professor Cançado Trindade, Doctor honoris causa of seven Latin American Universities in distinct countries, was for many years Judge of the Inter-American Court of Human Rights, and President of that Court for half a decade (1999-2004). He is currently Judge of the International Court of Justice; he is also Member of the Curatorium of The Hague Academy of International Law, as well as of the Institut de Droit International, and of the Brazilian Academy of Juridical Letters.

Widely regarded as the standard reference in the field, this book provides essential tools for understanding and assessing malingering and other response styles in forensic and clinical contexts. An integrating theme is the systematic application of detection strategies as conceptually grounded, empirically validated methods that bridge different measures and populations. Special topics include considerations in working with children and youth. From leading practitioners and researchers, the volume reviews the scientific knowledge base and offers best-practice guidelines for maximizing the accuracy of psychological and psychiatric evaluations.

This book explores the dilemmas posed by globalisation in various aspects of law. It covers diverse themes, ranging from the impact of different legislative measures, bilateral and regional agreements in the context of trade, investment and mobility of labour, to concerns about sustainability, equity, regional balance and social security in the light of globalisation. Although it focuses mainly on India and the European Union, the issues raised and challenges discussed are of a general nature, and as such relevant in the broader context. The chapters address contemporary problems in trade, investment and labour mobility, which have emerged through the complex interaction of market, state policies and socio-environmental concerns, and are expressed on national and global platforms in the context of evolving legal system. The book is a valuable resource for students, researchers and academics engaged in comparative legal studies, particularly those interested in studying the interplay of globalisation with various areas and aspects of law at national as well as international levels. It also appeals to anyone interested in law and policy studies.

What does it mean for education to be a fundamental right, and how may children benefit from it? Surprisingly, even when the right to education was added to the Indian Constitution as Article 21A, this question barely received any attention. The book identifies justiciability—or, more broadly, enforceability—as the most important feature of Article 21A, meaning that children and their parents must be provided with means to effectively claim their right from the State; otherwise, it would remain a ‘right’ only on paper. The book highlights how lack of access to the Indian judiciary means that the constitutional promise of justiciability remains unfulfilled. It deals with the possible alternative means the State may provide for the poor to claim the benefits under Article 21A, and identifies the grievance-redress mechanism created

by the 'Right of Children to Free and Compulsory Education Act, 2009' as a potential system of enforcement. Even though this system is found to be deficient, the book concludes with an optimistic outlook, hoping that rights advocates may, in the future, focus on improving such mechanisms for legal empowerment.

The situation of refugees is one of the most pressing and urgent problems facing the international community and refugee law has grown in recent years to a subject of global importance. This is the definitive reference and text for both mental health and legal professionals. Presented are findings, instruments, and procedures related to criminal and civil competencies, civil commitment, sentencing, personal injury claims, antidiscrimination laws, child custody, juvenile justice, and more.

Master teacher Thomas J. Miceli provides an introduction to law and economics that reveals how economic principles can explain the structure of the law and make it more efficient. The third edition of this seminal textbook is thoroughly updated to include recent

cases and the latest scholarship, with particular attention paid to torts, contracts, property rights, and the economics of crime. A new chapter organization, ideal for quarter- or semester-long courses, strengthens the book's focus on unifying themes in the field. A companion website is available at <http://www.sup.org/economiclaw>. It offers a full suite of resources for both students and professors. Key pedagogical features include cases; discussion points that provide additional analysis of topics in the book; graduate notes, which enrich the text for more advanced readers; and relevant links. Codex Bezae is one of the most important primary sources in New Testament scholarship. Together with Codex Alexandrinus and Codex Vaticanus it represents one of our most significant links back to the early Church and its origins. Since its rediscovery in the sixteenth century, the riddles posed by its general appearance and its textual characteristics have continued to fascinate scholars, and David Parker here offers a comprehensive study of Codex Bezae. This book aims to cast light on the story behind this most enigmatic of manuscripts. Data are presented here that makes possible a reconstruction of the stages of copying from which the manuscript descends. An appraisal of the earliest correctors of the Codex enables the author to extend his picture of its history to the medieval period.

This book examines some facets of gender relations in Cameroon - symmetry in male-female relationships, women's access to land in traditional society, socialization into gender roles through language textbooks in schools, the association life of women, widowhood and inheritance, social capital and entrepreneurship, husband-wife relations in early German colonial encounters - as socially and historically constructed realities from a multidisciplinary perspective, bringing together some social sciences and

humanities. The studies point to the fact that these relations are as much rooted in traditions and customs fashioned in several benchmark epochs in African history - arming women with formidable social and cultural capitals or making of them victims of social structures over which they have little control - as they are constantly evolving in contemporary times and transforming women into agents in their own affairs as well as those of the new societies in the making.

The Cambridge Yearbook of European Legal Studies provides a forum for the scrutiny of significant issues in European Union Law, the Law of the Council of Europe, and Comparative Law with a "European" dimension, and particularly those which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal Studies (CELS) Cambridge, which is the research Centre of Cambridge University Law Faculty specialising in European legal issues. The papers presented are all at the cutting edge of the fields which they address, and reflect the views of recognised experts drawn from the University world, legal practice, and the civil services of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders.

The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration.
