This book uncovers stakes and possibilities offered by Computational Intelligence and Predictive Analytics to Medical Science. The main focus is on data technologies, classification, analysis and mining, information retrieval, and in the algorithms needed to elaborate the informations. A section with use cases and applications follows the two main parts of the book, respectively dedicated to the foundations and techniques of the discipline.

Energy for Rural and Island Communities covers the proceedings of the conference held in Inverness, Scotland on September 22-24, 1980, which aims to gather several professionals concerned with energy supplies for island and rural communities in the 1980s. The papers in this collection are divided into six themes. The first three major topics the papers

tackle are the strategy and action in providing energy resource to rural and island communities; the community energy use and generation; and the renewable energy supplies. Other papers discuss several energy sources such as wind, water, and solar. The last part is devoted to presenting papers on development and planning in relation to energy consumption of island and rural communities. This compendium will be invaluable to government and private sectors, educational institutions, and others interested in studying the energy resource, consumption, and generation for island and rural populations.

History of the dams constructed by the governments of Madhya Pradesh and Rajasthan on the Chambal River.

Continuation of the reference work that originated with Robert Dodsley, written and published each year, which records and analyzes the year's major events, developments and trends in Great Britain and throughout the world. After 1815 the usual form became a number of chapters on Great Britain, paying particular attention to the proceedings of Parliament, followed by chapters covering other countries in turn, no longer limited to Europe. The expansion of the History came at the expense of the sketches, reviews and other essays so that the nineteenth-century publication ceased to have the miscellaneous character of its eighteenth-century
