Mcqs For The First Frcr 2011 Varut Vardhanabhuti Julia

Completely up to date with the latest exam changes, Get Through First FRCR: Questions for the Anatomy Module offers a valuable insight into the new anatomy exam. 170 high quality practice cases, each containing 5 question stems, are presented according to syllabus topics, accurately reflecting the content, style and level of difficulty of the actual examination questions. Anatomical images are included from all modalities commonly used in current radiological practice (plain x-rays, CT, MRI, ultrasound, nuclear medicine). Each case is supported by full explanatory answers, providing appropriate anatomy knowledge and relevant radiological learning points for the candidate. Featuring a wealth of practice questions plus one full mock examination, this book has been designed for candidates to assess their knowledge, identify topics that require further study and to build up confidence in preparation for the exam day. Written by Specialty Trainees in Radiology, Get Through First FRCR: Questions for the Anatomy Module is the essential revision tool for all First FRCR candidates preparing for the newly revised examination.

First FRCR Anatomy: Mock Papers offers the most up-to-date and comprehensive coverage of practice cases for trainees preparing for the First FRCR Anatomy exam. Chapters presented as 15 complete mock papers, covering the full range of imaging modalities. Featuring a wealth of practice cases covering all the key topics, this book provides the essential revision tool to maximise chances of exam success. Key Points 300 high quality images, reflecting the breadth of topics encountered in the actual exam 15 mock papers to enable trainees to practice and improve exam technique Highly illustrated to simplify complex anatomy and improve understanding Edited by highly experienced radiological anatomist, Professor Jamie Weir Complements First FRCR Anatomy: Practice Cases – the complete FRCR Anatomy revision package

Do you want to pass the FRCR Part 1 Physics Exam first time and with a high score? Are you looking for a comprehensive FRCR Part 1 Physics revision guide that is up-to-date and covers the syllabus? Succeeding in the FRCR Part 1 Physics Exam is an essential part of progressing through radiology training. This comprehensive revision guide is the most up-to-date available and covers the entire syllabus through detailed revision notes and practice MCQs. Written by doctors who have successfully passed the FRCR Part 1 Exam, this book is packed with detailed advice including topics that candidates co.

Following the new format of the First FRCR Anatomy Examination and based on the syllabus of the Royal College of Radiology, this unique revision tool is more complete and detailed than any other guide on the market. The comprehensive, structured approach promotes a working understanding of anatomy by guiding the reader through over 200 practice ima

Get Through FRCR Part 1: MCQs and Mock Examination is the essential and highly praised revision aid for the Royal College of Radiologists' FRCR Part 1 exam. Providing comprehensive coverage of the new FRCR Part 1 syllabus, this title presents questions in a similar style to the exam, accompanied by detailed yet uncomplicated explanations. Paying special attention to legislation, this book also covers recent advances in the field and radiation protection issues. Get Through FRCR Part 1 is ideal for FRCR candidates and tutors, radiographers, radiologists and medical physics students.

300 Single Best Answers for the Final FRCR Part A provides 300 practice MCQs, in the new style single best answer format, for candidates preparing for Final FRCR examinations. The book is organised into six chapters that reflect the format of the exam. Each chapter comprises 50 MCQs and an answer section that provides a detailed rationale for the correct response. Key Points Q&As mirror the new Single Best Answer format adopted by the RCR in 2009: few other books available in this new format Detailed rationales provided for every single question, so candidates understand why the correct answer is right

FRCR Part 1 Anatomy Mock MCQ Examinations provides essential practice for the new anatomy examination introduced by the Royal College of Radiologists. Written according to the syllabus set by the Royal College, each mock examination is laid out and structured in the same way as the actual papers, ensuring users gain familiarity with both the content and the style. Containing 10 mock examinations and 200 high quality MRI, CT, ultrasound, fluoroscopy, angiography and plain film images, all anatomical areas are covered, including normal variants and paediatric cases. By the end of the book, readers will have encountered every imaging modality and the majority of cases covered in the exam itself. Written by specialist registrars and a highly experienced radiology consultant and Fellowship examiner, FRCR Part 1 Anatomy Mock MCQ Examinations is the must-have revision tool for all Part 1 FRCR candidates.

A sound knowledge of basic sciences is vital for any doctor with an interest in ophthalmology, and is a significant part of all postgraduate examinations in the subject. Featuring 640 multiple choice questions, this is a comprehensive revision guide for candidates taking the basic sciences component of the FRCOphth and ICO examinations. It is highl

Comprehensive medical imaging physics notes aimed at those sitting the first FRCR physics exam in the UK and covering the scope of the Royal College of Radiologists syllabus. Written by Radiologists, the notes are concise and clearly organised with 100's of beautiful diagrams to aid understanding. The notes cover all of radiology physics, including basic science, x-ray imaging, CT, ultrasound, MRI, molecular imaging, and radiation dosimetry, protection and legislation. Although aimed at UK radiology trainees, it is also suitable for international residents taking similar examinations, postgraduate medical physics students and radiographers. The notes provide an excellent overview for anyone interested in the physics of radiology or just refreshing their knowledge. This third edition includes updates to reflect new legislation and many new illustrations, added sections, and removal of content no longer relevent to the FRCR physics exam. This edition has gone through strict critique and evaluation by physicists and other specialists to provide an accurate, understandable and up-to-date resource. The book summarises and pulls together content from the FRCR Physics Notes at Radiology Cafe and delivers it as a paperback or eBook for you to keep and read anytime. There are 7 main chapters, which are further subdivided into 60 sub-chapters so topics are easy to find. There is a comprehensive appendix and index at the back of the book.

Radiology has advanced at a great pace, allowing us a greater appreciation of anatomical detail. This has in turn placed a greater demand on the trainee radiologist's knowledge of anatomy. With these facts in mind the authors have written this collection of MCQs on radiological anatomy for the FRCR Part One exam. The questions are closely modelled on the examination, highlighting favoured exam topics. To make efficient use of trainee radiologists time extended answers have been prepared.

A revision aid for radiology trainees world-wide studying for their professional examinations in the field.

Physics MCQs for the Part 1 FRCR is a comprehensive and practical revision tool for the new format Part 1 FRCR examination, covering the complete physics curriculum. Key features: • Contains 300 questions that reflect the style and difficulty of the real exam • Covers basic physics, radiation legislation and all the imaging modalities included in the Royal College of Radiologists training curriculum and new FRCR examination • Includes new exam topics such as MRI and ultrasound imaging • Answers are accompanied by clear, detailed explanations giving candidates in-depth understanding of the topic • Much of the question material is based on the Radiology-Integrated Training Initiative (RITI), as recommended by the Royal College of Radiologists A must-have revision resource for all Part 1 FRCR candidates, Physics MCQs for the Part 1 FRCR is written by a team of specialist registrars who have recently successfully passed the Part 1 FRCR exam and a renowned medical physicist.

This book offers a collection of specimen multiple choice questions (MCQs) for the first FRCR examination in clinical radiology that is for the physics module. It includes questions arranged in nine sets of 40 MCQs following the examination format. Additionally, chapters cover explanation to some of the answers for better understanding of the topics. The book covers updated syllabus of Royal College of

Radiology (RCR), UK on scientific basis of medical imaging, including topics in molecular imaging. Each chapter with a practice set comprises of questions arranged in the order of the syllabus of the examination, starting from the basis of medical imaging and radiation physics to the principles of specific modalities and safety issues. This book offers assistance to candidates preparing for the first FRCR examination, clinical radiology trainees, and radiology and nuclear medicine postgraduate students.

This unique multiple choice question book contains 400 questions for the revised First FRCR exam. It comprehensively addresses the exam content and includes detailed answers, highlighted with key learning points throughout the text. Following the recent curriculum change this is the first book to address the significant changes within this crucial exam.

Providing everything you need to pass the FRCR Part 2A, this book provides a thorough assessment of a candidate's radiological knowledge. The book is divided into six chapters, with 75 questions in each chapter, mirroring the modules and exam papers laid out by the Royal College of Radiologists. This makes you as familiar as possible with its style, content and structure and facilitates directed learning. All questions have been formulated to reflect the current best practice and evidenced-base, ensuring candidates' knowledge of their field is up-to-date. A detailed explanation is provided for each question, including references to review publications or widely-used textbooks, which allow detailed follow-up on the issues discussed.

This is the first revision guide to map directly to the new structure of the FRCR Final Part A examination (CR2A). Spanning a broad range of topics, the book follows the core clinical radiology curriculum, covering all modalities. It is divided into 7 test papers, consisting of 120 mixed SBA-type questions with detailed answers in sequential order. Every answer is followed by a short explanation and relevant discussion around the topic with appropriate references. Each paper should take three hours to complete. Delivering over 20 hours of focused exam practice, this guide is a sound investment for trainee radiologists preparing for their Final Part A exam.

Eight test papers modelled on the RCR anatomy exam, written by experienced subspecialty radiologists and successful FRCR candidates.

First FRCR Anatomy: Practice Cases offers the most up-to-date and comprehensive coverage of practice cases for trainees preparing for the First FRCR Anatomy exam. Chapters are mapped to the syllabus to deliver structured revision in all the key topics, allowing trainees to focus on areas of weakness. Featuring a wealth of practice cases, this book provides the essential revision tool to maximise chances Key Points 240 high quality images, reflecting the breadth of topics encountered in the actual exam Includes practical advice on how to approach revision and useful tips to improve exam technique Visually-enhanced answers improve understanding of key concepts Covers all imaging modalities, including plain x-rays, CT, MRI and ultrasound Complements First FRCR Anatomy: Mock Papers – the complete Anatomy revision package

Multiple Choice Questions are the most common method of assessing knowledge in radiology. This book has more than 1000 questions, covering all the essential topics in Gastrointestinal Radiology. The questions have been divided into separate topics, which will enable revising the subjects on a topic basis, with due emphasis on anatomy, techniques and pathology. The questions have been designed on the format used by the Royal College of Radiologists UK, Ireland, Hong Kong, Australia and New Zealand. There is a single question with five stems, which require a true or false response. The answers and detailed explanations are provided at the end of each chapter. This book will be a valuable resource for review and practice prior to the Fellowship exams. Bibliographies have been provided for further reading.

Written specifically for those candidates about to sit for the FRCR part II examination, the format will also be of use to other trainee radiologists who are not specialists in this field. It contains a number of multiple choice questions covering all aspects of nuclear medicine with particular emphasis on the more common techniques, ie bone, renal and lung scanning. Extensive use is made of review articles, and important articles in the major nuclear medicine journals and references are provided.

QBase Radiology 1 and 2 together represent a completely comprehensive resource for all postgraduate and undergraduate trainees in radiology. In combination, the books include 900 multiple choice questions (480 on Volume 1 and 420 on Volume 2) and the free CD-ROMs that accompany both books also contain all 900 MCQs and over 100 high quality radiological images. The powerful QBase examination analysis software allows the reader to attempt the same exams as printed in the book, but on screen, realistically replicating the examination situation. The user can also 'custom-build' their own exams based on their own choice of subjects and number of questions, sit an exam that is automatically set by the program using all of the questions on the CD, or they can sit a 'shuffled' version of an exam, whereby the question parts (A-E) are reorganised automatically to avoid pattern recognition. The software also allows the user to set their own 'confidence level' when taking an exam and it will automatically mark, analyse and store completed exams for future review and re-sitting, allowing the package to be used as a fully interactive self-learning tool.

Ear, Nose and Throat (ENT) surgery has traditionally been a difficult and specialised topic in undergraduate medicine and for junior doctors. Many textbooks are too detailed for undergraduate use, or lack self assessment questions to help those wishing to underpin their learning. This concise and easy-to-read self-assessment guide aims to clarify the topic, and find and fill gaps in understanding. The multiple choice questions (MCQs) contained cover all levels of knowledge and the learning objectives of most of the UK medical school curricula, aiding preparation for end of unit, module and final exams for ENT. This book will be a valuable companion for clinics and teaching sessions and an indispensable revision primer for graduate entry medical curricula. 'An excellent means of preparation for medical undergraduate examinations as gaps in core knowledge are quickly revealed. Further, this text is a good guide for students to identify those subject areas requiring more focused study, especially when time is short.' - From the Foreword by Samir Soma

There are very few radiology multiple choice question books on the market that reflect the current trends and developments in the field of imaging. Hence, the emphasis of this book is on cross-sectional CT and MR imaging. It highlights the current understanding and concepts in the state-of-the-art imaging of a wide range of diseases in the body. The multiple choice questions are organised according to body systems and imaging modalities. There are twelve sections in the book, testing the reader in a broad range of imaging knowledge. The questions are accompanied by expanded answers, which provide the reader with a summary of the key facts relating to a particular topic. This is especially useful in assisting the reader in consolidating his or her understanding of the subject. The questions are devised in a format similar to those encountered in the Part 2A examination of the Royal College of Radiologists (UK) and the Part 2 examinations of the Joint Australian and New Zealand College of Radiology. Candidates taking the American Radiology Board examinations will also find the book informative.

Exclusively focused on preparing candidates for the FRCR Part 1 anatomy viewing paper, this book enables them to practice questions that have the look and feel of the actual exam. Containing eight practice examinations, each with 20 cases which have been thoroughly reviewed and tested by radiology registrars who have sat the exam, the questions are at increasing levels of difficulty. Screenshots from Osirix and advice on how to approach the exam familiarize candidates with its format. Each exam in the book contains a wide selection of images with all body parts and modalities equally represented to thoroughly test candidates interpretation skills. The 160 images cover all major plain films, CT, MRI, barium studies and other contrast examinations, as well as some of the newer techniques, based on the examples published online by the Royal College of Radiologists.

Completely up to date with the latest examination changes, Get Through First FRCR: MCQs for the Physics Module offers a valuable insight into the new Physics module of the First FRCR examination. Over 200 5-part True/False MCQs are presented according to syllabus topics, accurately reflecting the content, style and level of difficulty of the actual examination questions. All answers are supplemented with clear, detailed explanations to develop candidates' understanding and to explain why their answers are right, or wrong. Featuring a wealth of practice MCQs plus one full mock examination, this book has been designed for candidates to assess their knowledge, identify topics that require further study and to build up confidence in preparation for the exam day. Written by Specialty Trainees in Radiology, under the guidance and expertise of Jerry Williams, Consultant Medical Physicist, Get Through First FRCR: MCQs for the Physics Module is the essential revision tool for all First FRCR candidates preparing for the newly revised examination.

Single best answer (SBA) questions have been introduced into the FRCR Part 2A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. Candidates for other professional exams in Radiology will find the text useful, as will and those from other specialties wishing to explore the radiological aspects of their syllabus in greater depth. This is a companion volume to Final FRCR Part A Modules 4-6 Single Best Answer MCQs by the same team.

Previous ed. published as: Physics for medical imaging / R.F. Farr. c1997.

The book contains approx 2000 mcqs covering all aspects of radiology incuding radiophysics and radioprotection.MCQs are arranged chapter-vise with explanatory answers at the end of each chapter.The explanatory answers are useful for rapid review of concepts and facts at the time examinations,

Preparing for the Royal College of Radiologists MCQ Exams? You need the MCQ Books for the FRCR from Clinical Press. Sitting these mock examinations is an excellent method of testing your ability, preparing for the real event and revising at the same time!

Single best answer (SBA) questions have been introduced into the Final FRCR Part A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. Candidates for other professional exams in Radiology will find the text useful, as will and those from other specialties wishing to explore the radiological aspects of their syllabus in greater depth. This is a companion volume to Final FRCR Part A Modules 4-6 Single Best Answer MCQs by the same team.

Book and CD-ROM that provide a completely comprehensive resource for all postgraduate and undergraduate trainees in radiology taking MCQ examinations.

Reflecting the latest exam developments and covering the entire syllabus, this book focuses on providing complete revision coverage for the PACES exam. It is divided into five easy-to-use chapters, each representing a station from the exam, and integrates both the clinical and non-clinical aspects of the exam. It presents a wide range of commonly asked stations with detailed information laid out in a clear, concise manner, aided by photographs and diagrams.

Three years after the publication of the first edition, this book remains the best seller in its category based on its faithful representation of the FRCR Part 1 exam. The second edition is designed to reflect the change in exam format introduced in spring 2013. It includes two new chapters as well as some new cases in the remaining chapters and tests. Under the new exam format, candidates will be presented with 100 cases, with a single question per case and a single mark for the correct answer. This book covers all core topics addressed by the exam in a series of tests and includes chapters focussing specifically on paediatric cases and normal anatomical variants. The answers to questions, along with explanations and tips, are supplied at the end of each chapter. Care has been taken throughout to simulate the exam itself, so providing an excellent revision guide that will help candidates to identify the level of anatomical knowledge expected by the Royal College of Radiologists.

Get Through MRCPCH Part 1: BOFs and EMQs is an essential revision tool for candidates preparing for the MRCPCH Part 1 examination. This easy to read and comprehensive text has been written in response to changes in the MRCPCH entry criteria and contains 500 questions using the Best of Fives (BOFs) or Extended Matching Questions (EMQs) format. Get Through MRCPCH Part 1: BOFs and EMQs is an invaluable guide for paediatricians in training, those preparing for postgraduate examinations and for paediatricians wishing to update their knowledge. The author, Nagi Barakat, is a Consultant Paediatrician at Hillingdon Hospital, Uxbridge and Honorary Consultant, Paediatric Neurology Department, at Great Ormond Street Hospital for Sick Children, London, UK, and has previously authored several highly successful MRCPCH examination guides.

Postgraduates studying dermatology can face a lack of appropriate revision aids: reference books are often too exhaustive or out-of-date, while undergraduate and introductory texts lack the necessary detail and depth. This book is specifically designed for postgraduate examinations, and is the perfect accompaniment for the diploma in dermatology.

This multiple choice question book contains 400 questions for the revised First FRCR exam. It comprehensively addresses the exam content and includes detailed answers, highlighted with key learning points throughout the text.
