Provides information on how to upgrade, maintain, and troubleshoot the hardware of laptop computers, discussing the differences among them as well as their various configuration options.

All laptop and notebook computers will at some point need to be cleaned. This will prevent overheating and will prevent future component failure. Thermal damage is the number one reason that laptops fail and break down. I will start by discussing how to disassemble your laptop (this will show you how to disassemble any laptop). I will show you the tools and supplies needed for a proper cleaning. Then, once your laptop is apart, I will instruct you how to properly clean all internal components bringing your laptop back to "like new" condition and back to running "cool." These instructions are for everyone to use, you don't have to be technically inclined to clean your laptop. I will walk you through the whole process to ensure you have done a precise and professional job.
