Italian filmmaker Federico Fellini (1920-1993) is one of the most renowned figures in world cinema. Director of a long list of critically acclaimed motion pictures, including *La strada*, *La dolce vita*, *8 1/2*, and *Amarcord*, Fellini's success helped strengthen the international prestige of Italian cinema from the 1950s onward. Often remembered as an eccentric auteur with a vivid imagination and a penchant for quasi-autobiographical works, the carnivalesque, and Rubenesque women, Fellini's inimitable films celebrate the creative potential of cinema as a medium and also provide thought-provoking evocations of various periods in Italian history, from the years of fascism to the age of Silvio Berlusconi's media empire. In *Making a Film* Fellini discusses his childhood and adolescence in the coastal town of Rimini, the time he spent as a cartoonist, journalist, and screenwriter in Rome, his decisive encounter with Roberto Rossellini, and his own movies, from *Variety Lights* to *Casanova*. The director explains the importance of drawing to his creative process, the mysterious ways in which ideas for films arise, his collaborations with his wife, Giulietta Masina, his thoughts on fascism, Jung, and the relationship between cinema and television. Often comic, sometimes tragic, and rife with insightful comments on his craft, *Making a Film* sheds light on

Fellini's life and reveals the motivations behind many of his most fascinating movies. Available for the first time in its entirety in English, this volume contains the complete translation of *Fare un film*, the authoritative collection of writings edited and reworked by Fellini and initially published by Giulio Einaudi in 1980. The text includes a new translation of the Italo Calvino essay "A Spectator's Autobiography," an introduction by Italian film scholar Christopher B. White, and an afterward by Fellini's longtime friend and collaborator Liliana Betti.

This three-volume Encyclopedia of Law Enforcement provides a comprehensive, critical, and descriptive examination of all facets of law enforcement on the state and local, federal and national, and international stages. This work is a unique reference source that provides readers with informed discussions on the practice and theory of policing in an historical and contemporary framework. The volumes treat subjects that are particular to the area of state and local, federal and national, and international policing. Many of the themes and issues of policing cut across disciplinary borders, however, and several entries provide comparative information that places the subject in context.

This innovative text examines videogames and gaming from the point of view of discourse analysis. In particular, it studies two major aspects of videogame-related communication: the ways in which videogames and their makers convey meanings to their audiences, and the ways in which gamers, industry professionals, journalists and other stakeholders talk about games. In doing so, the book offers systematic analyses of games as artefacts and activities, and the discourses surrounding them. Focal areas explored in this book include:

- aspects of videogame textuality and how games relate to other texts
- the formation of lexical terms and use of metaphor in the language of gaming
- gamer

slang and 'buddylects' • the construction of game worlds and their rules, of gamer identities and communities • dominant discourse patterns among gamers and how they relate to the nature of gaming • the multimodal language of games and gaming • the ways in which ideologies of race, gender, media effects and language are constructed. Informed by the very latest scholarship and illustrated with topical examples throughout, *The Language of Gaming* is ideal for students of applied linguistics, videogame studies and media studies who are seeking a wide-ranging introduction to the field.

A beautifully observed history of the British home front during the Napoleonic Wars by a celebrated historian We know the thrilling, terrible stories of the battles of the Napoleonic Wars—but what of those left behind? The people on a Norfolk farm, in a Yorkshire mill, a Welsh iron foundry, an Irish village, a London bank, a Scottish mountain? The aristocrats and paupers, old and young, butchers and bakers and candlestick makers—how did the war touch their lives? Jenny Uglow, the prizewinning author of *The Lunar Men* and *Nature's Engraver*, follows the gripping back-and-forth of the first global war but turns the news upside down, seeing how it reached the people. Illustrated by the satires of Gillray and Rowlandson and the paintings of Turner and Constable, and combining the familiar voices of Austen, Wordsworth, Scott, and Byron with others lost in the crowd, *In These Times* delves into the archives to tell the moving story of how people lived and loved and sang and wrote, struggling through hard times and opening new horizons that would change their country for a century.

Liberal democracies are based on principles of inclusion and tolerance. But how does the principle of tolerance work in practice in countries such as Germany, France, India, South Africa, and the United States, where an increasingly wide range of cultural groups holds often contradictory beliefs

about appropriate social and family life practices? As these democracies expand to include peoples of vastly different cultural backgrounds, the limits of tolerance are being tested as never before. *Engaging Cultural Differences* explores how liberal democracies respond socially and legally to differences in the cultural and religious practices of their minority groups. Building on such examples, the contributors examine the role of tolerance in practical encounters between state officials and immigrants, and between members of longstanding majority groups and increasing numbers of minority groups. The volume also considers the theoretical implications of expanding the realm of tolerance. Some contributors are reluctant to broaden the scope of tolerance, while others insist that the notion of "tolerance" is itself potentially confining and demeaning and that modern nations should aspire to celebrate cultural differences. Coming to terms with ethnic diversity and cultural differences has become a major public policy concern in contemporary liberal democracies, as they struggle to adjust to burgeoning immigrant populations. *Engaging Cultural Differences* provides a compelling examination of the challenges of multiculturalism and reveals a deep understanding of the challenges democracies face as they seek to accommodate their citizens' diverse beliefs and practices.

Proceedings of a symposium organized by Freedom House. In June of 1987, Freedom House convened a conference in which fourteen emigres and dissidents from Yugoslavia discussed the current crisis in the countryóits causes and possible solutions. Readers of this monograph will be able to judge for themselves the degree to which the participants succeeded in illuminating the complicated economic, political and ethnic situation in a country that seems to be on the brink of collapse. However, the significance of the conference lies in the fact that for the first time in decades representatives of the different national, political and religious strains that characterize Yugoslavia met and "talked to each other." That is no small accomplishment.

For most of three decades, Drew Pearson was the most well-known journalist in the United States. In his daily newspaper column—the most widely syndicated in the nation—and on radio and television broadcasts, he chronicled the political and public policy news of the nation. At the same time, he worked his way into the inner circles of policy makers in the White House and Congress, lobbying for issues he believed would promote better government and world peace. Pearson, however, still found time to record his thoughts and observations in his personal diary. Published here for the first time, *Washington Merry-Go-Round* presents Pearson's private impressions of life inside the Beltway from 1960 to 1969, revealing how he held the confidence of presidents—especially Lyndon B. Johnson—congressional leaders, media moguls, political insiders, and dozens of

otherwise unknown sources of information. His direct interactions with the DC glitterati, including Bobby Kennedy and Douglas MacArthur, are featured throughout his diary, drawing the reader into the compelling political intrigues of 1960s Washington and providing the mysterious backstory on the famous and the notorious of the era.

Wolfgang Sachs is one of the most thoughtful intellectuals to deal with the dual crisis in the Western world's relations with nature and social justice. In this book readers will find trenchant and elegant explorations of some of the foremost issues the world faces at the beginning of the new century: efficiency--the mantra of our times; speed--the love affair with modernity; globalization--a market inevitability and the juggernaut of history?; sustainability--oxymoron as rhetoric; development--the 20th century's great undelivered promise; limits--a new principle for the coming century.

greatest catastrophe. The book offers a vibrant picture of a world full of plungers, powerful bankers, corporate titans, millionaire brokers, and buoyantly optimistic stock market bulls. We meet Sunshine Charley Mitchell, head of the National City Bank, powerful financiers Jack Morgan and Jacob Schiff, Wall Street manipulators such as the legendary Jesse Livermore, and the lavish-living Billy Durant, founder of General Motors. As Klein follows the careers of these men, he shows us how the financial house of cards gradually grew taller, as the irrational exuberance of an earlier age gripped America and convinced us that the market would continue to rise forever. Then, in October 1929, came a "perfect storm"-like convergence of factors that shook Wall Street to its foundations. We relive Black Thursday, when police lined Wall Street, brokers grew hysterical, customers "bellowed like lunatics," and the ticker tape fell hours behind. This compelling history of the Crash--the first to follow the market closely for the two years leading up to the disaster--illuminates a major turning point in our history. The classic work that revolutionized the way business is conducted across cultures around the world.

Sitting on pins and needles, anxiously waiting to see what will happen next, horror audiences crave the fear and exhilaration generated by a terrifying story; their anticipation is palpable. But they also breathe a sigh of relief when the action is over, when they are able to close their books or leave the movie theater. Whether serious, kitschy, frightening, or ridiculous, horror not only arouses the senses but also raises profound questions about fear, safety, justice, and suffering. From literature and urban legends to film and television, horror's ability to thrill has made it an integral part of modern entertainment. Thomas Fahy and twelve other scholars reveal the underlying themes of the genre in *The Philosophy of Horror*. Examining the evolving role of horror, the contributing

authors investigate works such as Mary Shelley's *Frankenstein* (1818), horror films of the 1930s, Stephen King's novels, Stanley Kubrick's adaptation of *The Shining* (1980), and Alfred Hitchcock's *Psycho* (1960). Also examined are works that have largely been ignored in philosophical circles, including Truman Capote's *In Cold Blood* (1965), Patrick Süskind's *Perfume* (1985), and James Purdy's *Narrow Rooms* (2005). The analysis also extends to contemporary forms of popular horror and "torture-horror" films of the last decade, including *Saw* (2004), *Hostel* (2005), *The Devil's Rejects* (2005), and *The Hills Have Eyes* (2006), as well as the ongoing popularity of horror on the small screen. *The Philosophy of Horror* celebrates the strange, compelling, and disturbing elements of horror, drawing on interpretive approaches such as feminist, postcolonial, Marxist, and psychoanalytic criticism. The book invites readers to consider horror's various manifestations and transformations since the late 1700s, probing its social, cultural, and political functions in today's media-hungry society.

The value of international human rights during the last half of the twentieth century is undoubted. Nevertheless, power exercised in the name of human rights can be misused or abused. As human rights institutions matured, human rights advocates and their critics worried about whether quests to vindicate supposedly universal human rights might sometimes impose western, first-world norms on cultures that did not want them. The papers collected in this volume address that question.

An inquiry into the nature of human rights, the relationship of the issue of human rights to policy making and strategic thinking, and the effect of the human rights issue on the conflict between the Soviet Union and the Western liberal democracies. Michael Novak begins by boldly stating five theses of human rights. He proceeds to clarify what he means by human rights in the Judeo-Christian tradition that underlies Western political thought and concludes with a variety of policy recommendations.

The practice of female genital cutting, sometimes referred to as female circumcision and common in a number of African states, has attracted increasing attention in recent years and mobilized strong international opposition. While it typically produces a visceral response of horror and revulsion in Westerners, the practice is widely regarded in some cultures as essential for proper development into womanhood and is defended by women who have themselves experienced it and who have had the procedure performed on their own daughters. It is also perceived in many Islamic communities as religiously prescribed, although most Islamic clerics do not condone the practice. In this study, sociologist Elizabeth Boyle examines this controversial issue from the perspectives of the international system, governments, and individuals. Drawing on previous scholarship, records of international organizations, demographic surveys, and the popular media, Boyle examines how the issue is perceived and acted upon at international, national, and individual levels. Grounding her work in the sociological theory of neoinstitutionalism, Boyle describes how the choices made by governments and individual women are influenced by the often conflicting principles of individual human rights and sovereign autonomy. She concludes that while globalization may exacerbate such conflicts, it can ultimately lead to social change.

In this fascinating volume, Carlos P. Romulo, retired Foreign Minister of the Philippines and first Asian President of the United Nations, describes the development of that organization from its founding in San Francisco in 1945, when he signed its charter, to his farewell speech to the General Assembly in the fall of 1983. Related in the form of personal memories and impressions, the facts and dates in his narrative have been thoroughly checked and corroborated by his wife and co-author so that they blend integrally with the broader fabric of United Nations history. Not only is this a personal memoir but also an accurate and valuable historical account of a critical period in the history of the world.

After outlining the history of the struggle for freedom of expression in Cuba from the 19th century to Castro's assumption of power, the author details how that freedom has been systematically curtailed under the Castro regime. Separate chapters are devoted to the stifling of freedom in journalism and to Castro's drive to harness artistic creation as a servant of ideology. The author illustrates his account of the regulation of culture by providing case studies of the persecution of two intellectuals, both dissident Marxists, who ran afoul of Castro's cult of personality.

China's official policy towards religion is little known in the West for a variety of reasons. The tribulations to which religious believers and organizations have been subjected, and the limitations on religious freedom are, however, very real and frequently very harsh, as this account of the Catholic church in China since Mao's triumph in 1949 will attest. Soviet Union and the end of the Cold War. Still NATO globalized relentlessly, moving from defensive to offensive under pretexts of humanitarianism, starting with Yugoslavia, then East Africa, Afghanistan, and most recently Libya, acting as an arm of the Pentagon. The danger to global equilibrium is a growing NATO being expanded further by American and British ambitions into a monster military force of world proportions, way beyond any Atlantic or European alliance. NATO expansion, intrusive military hardware, such as cyber technology/interference and the murderous capacity of drones is threatening North/South peace. The creeping NATO expansion into Asia, the attempt to surround Russia, China and others can only end badly for the billions of human beings involved. The recent mini-US occupation of Australia, the interference in the ASEAN countries by US arms dealers and naval forces, the menacing presence of US aircraft carriers in the Indian Ocean, the South China Sea and the Strait of Malacca should remind historians of just why the Japanese considered it necessary to attack Pearl Harbor to end the US naval strangle hold imposed upon them. NATO as it expands today is absolutely not what the world of struggling economies and deprived populations require. It is nothing, but a negative force.
