Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for speed!

Exploring the concept of win-win agreements, this book analyses how they pose an important challenge for entrepreneurs, managers and advisors involved in complex negotiations among firms. Providing an overview and discussion of existing literature, the author further develops a theoretical framework for analysing corporate negotiations, and illustrates how this can be implemented in real-life situations. This book presents an empirical case study from the automotive industry and analyses the negotiation between Fiat Chrysler in 2009,

The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

Inorganic Bioelectrochemistry provides a thorough overview of the state of the art in this crucial area of research. In addition, the book helps readers understand where the field is heading and what new developments are on the horizon. Eight chapters written by leading international experts cover crucial topics such as electron and proton transfer in metalloprotein systems, electrochemistry and electrocatalysis of redox enzymes, and electrochemistry of DNA-based molecules.

The Garden Wildlife Manual is the definitive guide to providing your garden with microhabitats and wildlife, showing that with a little thought and effort you can improve your own piece of the environment, however small. This highly practical book includes many DIY projects, with a focus on using recycled materials. The step-by-step projects are illustrated with photographs and drawings, and include tools and material lists, the time needed for each project and guidance on which projects are best for your garden. Projects include: wildlife ponds and pools, nest

boxes, rockeries, hibernation shelters, bird baths, squirrel assault courses, feeding puzzles, feeding tables, and collecting traps.

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.
