

S500i User Guide

Transition metal oxides constitute an important class of inorganic materials with fascinating structures and properties. Many technologically important materials are oxides. The topic is hot at least because of the electronic industry (semiconductors) and the work on superconductors. The authors are worldclass highly respected scientists. Being an authored text, name recognition will be a feature for selling it. The topic has not been reviewed systematically in a long time, although review articles have appeared regularly in the literature. This monograph will provide a tutorial overview of the topic, as well as be a useful handbook/guide.

It is the wedding the world thought would never happen - two of Greece's oldest feuding families to finally unite. But the marriage is not as it seems. Alesia has been bought by Sebastian. Now all he wants is a child to bind the feuding families. Little does he know that is something Alesia would never give him.

An astoundingly clear adaptation of Tanya, one of the most influential works of Jewish spiritual thought ever written, penned by Chasidic Rebbe, Rabbi Shneur Zalman of Liadi (1745-1812). This atlas presents technical information for professionals who process and use temperate or tropical timber. It combines the main technical characteristics of 283 tropical species and 17 species from temperate regions most commonly used in Europe with their primary uses.

This book explores the factors that influence violent rebellious political organisations to transform into other entities, such as political parties, criminal organisations and terrorist organisations. From the end of the Second World War until 1990, many events

in the world centred on the bipolar struggle between the United States and the USSR. Although there were numerous civil wars occurring during the Cold War era, many of these conflicts went virtually unnoticed unless they were linked to the Cold War struggle for ideological dominance. In the aftermath of the fall of the Soviet Union, the number of intra-state conflicts was prevalent around the globe. Along with the occurrence of civil wars, a variety of violent political movements also developed. Examining cases from Latin America, Africa, Europe, and Asia, this book addresses how violent political movements transform during and after conflict into new types of organisations using the collective political violence transformative (CPVT) model. The study uses a combination of pre-existing literature from the fields of sociology and political science, archival research, and interviews with movement members (former and active) conducted by the author. In studying the Provisional IRA and Sinn Féin, the Spear of the Nation (MK) and the African National Congress (ANC), the Abu Sayyaf Group and the Revolutionary Armed Forces of Colombia (FARC-EP), *Transforming Violent Political Movements* paints a picture of organisations that have to respond to their environments to survive. This book will be of much interest to students of political violence, terrorism, war and conflict studies, security studies and IR.

Melissa Bubnic's *Beached* is a darkly funny comedy about modern freak shows, love and cream buns. Loads of cream buns. Arty is the world's fattest teenager. At sixty-seven stone, he is a young man literally going nowhere. All that is set to change when a reality TV crew moves in to ruthlessly document Arty's supposed transformation from bedridden walrus to trousered sophisticate. But with the cameras rolling, something totally unexpected happens – Arty falls in love. *Beached* had its British premiere at the Marlowe Theatre, Canterbury, in 2014 before transferring to Soho Theatre, London. It won the 2010 Patrick White
