This book on Thesis Writing for Master's and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The idea for this book was originally conceived by Terrill Mast in conversations with Roland Folse. Dr. Mast was dedicated to the belief that all medical teachers should be generalists with skills and knowledge in all aspects of the field. Before his untimely death, he recruited most of the prestigious contributors to this important new book. This comprehensive volume features a review of the major topics in medical and surgical education by today's leading authorities in the field. The assembled authors represent a "Who's Who" in medical education around the world. Each chapter provides a state-of-the-art overview of the topic along with the projected changes most likely to occur over the next decade. A "must-have" for anyone responsible for educating students, residents, and physicians in the medical and surgical fields, this new book addresses the critical medical educational issues of the next millennium, in one, comprehensive volume.

Includes recommended citation format styles for journals, books, conference publications, patents, audio visuals, electronic information, maps, legal materials, newspaper articles, bibliographies, dissertations, and scientific reports.

This volume offers new research on an essential but often controversial aspect of life in Dynastic Egypt. Its originality lies in combining research which uses Egyptology's traditional strengths, philological and iconographic, with reflections on material culture and on the discipline of Egyptology itself. The authors are internationally-recognized authorities in their fields.

This volume offers a path-breaking reassessment of Xu Bing's oeuvre by analyzing the diverse cultural environments in which his work has developed since the Book from the Sky. It contains three lecture transcripts and eight art historical essays; these explore themes such as Xu's animal works, audience participation, new ink, prints, realism, socialist spectacle, and word play. A critical question addressed in this volume is what carries art to a global level beyond regional histories and cultural symbols. Absorbing critical essays on contemporary Chinese aesthetics addressing the social context and philosophical concerns that underlie Xu Bing's key works. The authors analyze Xu's art, shedding light on the tangled history of socialism and neoliberalism in the Post-Mao period. --Prof. Dr. Lothar Ledderose, Senior Professor, Institute of East Asian Art, Universität Heidelberg

The author has delicately described his many personal experiences and happenings during his eighty-nine exciting years. His childhood, meeting the girl, his War II articles, and later years.

During World War II, polio epidemics in the United States were viewed as the country's "other war at home": they could be neither predicted nor contained, and paralyzed patients faced disability in a world unfriendly to the disabled. These realities were exacerbated by the medical community's enforced orthodoxy in treating the disease, treatments that generally consisted of ineffective therapies. Polio Wars is the story of Sister Elizabeth Kenny -- "Sister" being a reference to her status as a senior nurse, not a religious designation -- who arrived in the US from Australia in 1940 espousing an unorthodox approach to the treatment of polio. Kenny approached the disease as a non-neurological affliction, championing such novel therapies as hot packs and muscle
