

Strategic Marketing By Nigel Piercy David W Cravens

'Tales from the Marketplace: Stories of Revolution, Reinvention and Renewal' is a highly innovative approach to building an understanding of the realities of market-led strategic change in companies. It provides an engaging, honest, and effective understanding of real market strategy in major organizations by focussing on the forces behind value-driven strategy. Nigel Piercy provides new and incisive insights into strategy and marketing through business "stories" that are contemporary and provocative. These new "stories" depict how major organizations have experienced revolution in their traditional markets - created by new types of competitors with new business models. The search for superior value is overtaking traditional brand and relationship strategies. The challenge to companies is reinvention and renewal and the alternative is obsolescence and decline. After all, did the major banks really expect to be competing with supermarkets, car companies, Virgin and internet-based companies to provide retail bank services? The book is based on the author's view that: - Business is exciting, turbulent and unpredictable - the "stories" we read and study should be too! - From Dell Computers and easyJet to Amazon.com and Skoda Cars, it is the most innovative companies that have most to teach us about reinvention and new business models - The inflexible analytical frameworks of the past no longer apply - "stories" of reinvention and renewal show the creative strategies developed by companies to cope with threats and exploit opportunities around them. 'Tales from the Marketplace' is essential, timely and designed to be highly readable for managers. It also provides an innovative approach for undergraduate and MBA level teachers and students, and for participants on executive programmes in marketing and strategic management.

Looks at the benefits of business alliances, discusses actual cases, and offers advice on managing strategic alliances and networks

This book offers management students and managers new insights by approaching exporting from the perspective of marketing planning, rather than the mechanics of export practice. The author evaluates the widely recommended strategy of key market concentration, showing its weaknesses and the flaws in the supporting evidence. The book provides the reader with a framework for making an explicit and informed choice between the real market options faced in practical export situations, which takes into account the many company and market factors shaping such strategies. Closely related to market strategy is the competitive base for a company's exporting, particularly in balancing price and non-price forms of competition, and this is assessed in the second part of the book.

The Oxford Handbook of Strategic Sales and Sales Management is an unrivalled overview by leading academics in the field of sales and marketing management. Sales theory is experiencing a renaissance driven by a number of factors, including building profitable relationships, creating/delivering brand value, strategic customer management, sales and marketing relationships, global selling, and the change from transactional to customer relationship marketing. Escalating sales and selling costs require organisations to be more focused on results and highlight the shifting of resources from marketing to sales. Further the growth in customer power now requires a strategic sales response, and not just a tactical one. The positioning of sales within the organisation, the sales function and sales management are

all discussed. The Handbook is not a general sales management text about managing a sales force, but will fill a gap in the existing literature through consolidating the current academic research in the sales area. The Handbook is structured around four key topics. The first section explores the strategic positioning of the sales function within the modern organisation. The second considers sales management and recent developments. The third section examines the sales relationship with the customer and highlights how sales is responding to the modern environment. Finally, the fourth section reviews the internal composition of sales within the organisation. The Handbook will provide a comprehensive introduction to the latest research in sales management, and is suitable for academics, professionals, and those taking professional qualifications in sales and marketing.

Based on their combined experience of over half a century of advising companies, the authors argue that marketing has lost its way. Companies cannot win in today's highly competitive markets by leaving marketing up to the marketing department. Success in the new marketplace demands integration of the firm's entire set of capabilities into a seamless system that delivers exemplary customer satisfaction, if not delight. Integrating marketing is imperative, from the top down, and with every major function: finance, operations, sales, R&D, customer service and HR. Only by creating "Total Integrated Marketing", ensuring that everyone in the organization has one paramount goal to get and keep customers can success be achieved. The authors provide a wealth of marketing tips and innovations that readers can easily adapt to their own businesses and revealing cases that lift the lid on good and bad practice around the world. Thoroughly updated with new examples and the latest research findings, this new edition also boasts case studies in each chapter, taken from recent editions of the Financial Times, that illustrate the practical implications of the issues raised.

A compilation of the established knowledge in strategic account management While companies and academics expend tremendous effort on mass marketing, they often overlook their immediate customers (which are critical in both senses) and hence the importance of strategic account management (SAM). This handbook is a compilation of papers that present researched knowledge of SAM across the academic community which fills a void in the existing academic literature. Handbook of Strategic Account Management identifies drivers of the SAM approach, key issues and success factors, operational needs and areas still awaiting exploration. Each paper includes an overall referenced summary of the tenets of SAM relevant to the area it reports, and together with the combined list of references, it creates an indispensable resource for academic readers, students, and researchers. Handbook of Strategic Account Management is written by over 40 knowledgeable experts with substantial experience of SAM from teaching, researching, writing and advising companies on why and how it works, spread widely across Europe and the US. It represents the balanced, researched body of knowledge in SAM and will be an invaluable resource to anyone exploring the approach, whether for a student thesis, for original research or for answers on how to approach SAM as a company initiative. "Today's strategic, key and global account management professionals owe thanks to a small community of academic researchers who, over the past three decades have been pioneers in identifying, cataloguing and analyzing the selling and business management practices of an emerging profession we now call strategic account management. This Handbook is an important milestone to mark SAM's still evolving impact on corporate business strategies and its ever-increasing relevance as a proven engine for growth in business-to-business strategic customer relationships." The text is a European adaptation of our current US book: Strategic Market Management, 9th Edition by David Aaker. This new edition is a mainstream text suitable for all business students studying strategy and marketing courses. Strategic Market Management: Global Perspectives is motivated by the strategic challenges created by the dynamic nature of markets. The premise is that all traditional strategic management tools either do not apply or need to be adapted to a more dynamic context. The unique aspects of the book are its inclusion of: A business strategy definition that includes product/market scope, value proposition, and assets and competences. A structured strategic analysis including a detailed customer, competitor, market, and environmental analysis leading to an understanding of market dynamics that is supported by a summary flow diagram, a set of agendas to help start the process, and a set of planning forms. Concepts of strategic commitment, opportunism, and adaptability and how they can and should be blended together. Bases of a value proposition and strong brands. A strategy without a compelling value proposition will not be market driven or successful. Brand assets that will support a business strategy need to be developed. Creating synergistic marketing with silo organisations defined by products or countries. All organisations have multiple products and markets and creating cooperation and communication instead of competition and isolation is becoming an imperative. A global perspective is an essential aspect of this new edition. This reflects the lived experience of the student reader but also their likely professional challenges. This is achieved by the extensive use of new examples and vignettes.

A revolution is taking place in the way companies organize and manage the 'front-end' of their organization, where it meets its customers. Traditional concepts of sales management, account management, and customer service are being overtaken by initiatives like customer business development, the strategic sales organization, and strategic customer management. This book aims to provide insights into how this revolution is unfolding and to provide a framework for executives and management students to address the issues involved. The book focuses on the transformation of the traditional sales organization into a strategic force leading the strategic customer management process in companies. Traditionally, the area of sales management has mainly been treated as a tactical, operational topic in the conventional marketing literature - simply part of the communications mix within the planned marketing programme. However, the emergence of major customers as dominant buyers in many sectors as a result of pressures towards consolidation and enhanced scale of operations, is changing the way in which sales issues are addressed in supplier organizations. The growth of new forms of buyer-seller relationship based on collaboration and partnering has encouraged organizations to reconsider the sales and account management operation as an important source of competitive differentiation in commoditized markets. Increasingly, sales is being perceived as a central part of business strategy and attention given to the challenges in better aligning sales processes with strategy. This has many implications for the design of the sales organization and its management strategy, which go far beyond the confines of conventional marketing views.

Does the NYPD manipulate crime reports to make them appear better? How does the NYPD handle mass demonstrations? How does the community view the NYPD? How can an individual start a grassroots movement to influence policy and practices? The book explores hiring, firing, and retention; analyzes crime-fighting strategies; discusses the drop in homicide rate in recent years; and reviews legal concerns and the response to public demonstrations such as the Occupy Wall Street movement.
