This riveting tale of the Kohinoor, the world's most coveted gem, unearths fascinating new information as it moves from the Mughal court to Persia to Afghanistan; from Maharaja Ranjit Singh's durbar in Punjab to the Queen of England's Crown. A thrilling tale, full of violence, drama and intrigue.

This book contains articles on historic cities of the Islamic world, ranging from West Africa to Malaysia, which over the centuries have been centres of culture and learning and of economic and commercial life, and which have contributed much to the consolidation of Islam as a faith and as a social and political institution. The articles have been taken from the second edition of the Encyclopaedia of Islam, completed in 2004, but in many cases expanded and rewritten. All have been updated to include fresh historical information, with note of contemporary social developments and population statistics. The book thus delineates the urban background of Islam as it has evolved up to the present day, highlighting the role of such great cities as Cairo, Istanbul, Baghdad and Delhi in Islamic history, and also brings them together in a rich panorama illustrating one of mankind's greatest achievements, the living organism of the city.

Translated from the Tamil by Pritham K. Chakravarthy and Rakesh Khanna. With its mad patchwork of phone sex conversations, nightmarish torture scenes, tender love poems, numerology, mythology, and compulsive name-dropping of Latin American intellectuals, Charu Nivedita's novel ZERO DEGREE stands out as a groundbreaking work of Tamil transgressive fiction that unflinchingly probes the deepest psychic wounds of humanity. "Hide it in the deep recesses of your clothes cupboard or in the general chaos of your office desk, if you must, but read it"--Asha S. Menon, New Sunday Express.

A contemporary follow-up to the groundbreaking Power of Maps, this book takes a fresh look at what maps do, whose interests they serve, and how they can be used in surprising, creative, and radical ways. Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators. He demystifies the hidden assumptions of map making and explores the promises and limitations of diverse

counter-mapping practices today. Thought-provoking illustrations include U.S. Geological Survey maps; electoral and transportation maps; and numerous examples of critical cartography, participatory GIS, and map art. The book will be important reading for geographers and others interested in maps and their political uses. It will also serve as a supplemental text in advanced undergraduate- and graduate-level courses such as Cartography, GIS, Geographic Thought, and History of Geography.

HATE dispels misunderstandings plaguing our perennial debates about "hate speech vs. free speech," showing that the First Amendment approach promotes free speech and democracy, equality, and societal harmony. We hear too many incorrect assertions that "hate speech" -- which has no generally accepted definition -- is either absolutely unprotected or absolutely protected from censorship. Rather, U.S. law allows government to punish hateful or discriminatory speech in specific contexts when it directly causes imminent serious harm. Yet, government may not punish such speech solely because its message is disfavored, disturbing, or vaguely feared to possibly contribute to some future harm. When U.S. officials formerly wielded such broad censorship power, they suppressed dissident speech, including equal rights advocacy. Likewise, current politicians have attacked Black Lives Matter protests as "hate speech." "Hate speech" censorship proponents stress the potential harms such speech might further: discrimination, violence, and psychic injuries. However, there has been little analysis of whether censorship effectively counters the feared injuries. Citing evidence from many countries, this book shows that "hate

speech" laws are at best ineffective and at worst counterproductive. Their inevitably vague terms invest enforcing officials with broad discretion, and predictably, regular targets are minority views and speakers. Therefore, prominent social justice advocates in the U.S. and beyond maintain that the best way to resist hate and promote equality is not censorship, but rather, vigorous "counterspeech" and activism.

Enclosure marshals bold new arguments about the nature of the conflict in Israel/Palestine. Gary Fields examines the dispossession of Palestinians from their land--and Israel's rationale for seizing control of Palestinian land--in the contexts of a broad historical analysis of power and space and of an enduring discourse about land improvement. Focusing on the English enclosures (which eradicated access to common land across the English countryside), Amerindian dispossession in colonial America, and Palestinian land loss, Fields shows how

exclusionary landscapes have emerged across time and geography. Evidence that the same moral, legal, and cartographic arguments were used by enclosers of land in very different historical environments challenges Israel's current claim that it is uniquely beleaguered. This comparative framework also helps readers in the United States and the United Kingdom understand the Israeli/Palestinian conflict in the context of their own histories.

Prior to the twentieth century, Arab society in Palestine was predominantly illiterate, with most social and political activities conducted through oral communication. There were no printing presses, no book or periodical production, and no written signs in public places. But a groundswell of change rapidly raised the region's literacy rates, a fascinating transformation explored for the first time in *Reading Palestine*. Addressing an exciting aspect of Middle Eastern history as well as the power of the printed word itself, *Reading Palestine* describes how this hurried process intensified the role of literacy in every sphere of community life. Ami Ayalon examines Palestine's development of a modern educational system in conjunction with the emergence of a print industry, libraries and reading clubs, and the impact of print media on urban and rural populations. Drawn from extensive archival sources, official reports, autobiographies, and a rich trove of early Palestinian journalism, *Reading Palestine* provides crucial insight into the dynamic rise of literacy that revolutionized the way Palestinians navigated turbulent political waters.

and other sectors, innovations in digital signal processing have risen to meet the demand. Presenting a long overdue, up-to-date, dedicated resource on radar signals, the authors fill a critical gap in radar technology literature. Radar Signals features in-depth coverage of the most prevalent classical and modern radar signals used today, as well as new signal concepts developed in recent years. Inclusion of key MATLAB software codes throughout the book demonstrates how they dramatically simplify the process of describing and analyzing complex signals. Topics covered include: * Matched filter and ambiguity function concepts * Basic radar signals, with both analytical and numerical analysis * Frequency modulated and phase-coded pulses * Complete discussion of band-limiting schemes * Coherent LFM pulse trains—the most popular radar signal * Diversity in pulse trains, including stepped frequency pulses * Continuous-wave signals * Multicarrier phase-coded signals Combining lucid explanation, preferred signal tables, MATLAB codes, and problem sets in each chapter, Radar Signals is an essential reference for professionals—and a systematic tutorial for anyone seeking to broaden their knowledge base in this dynamic field.

Eating With History: Ancient Trade-Influenced Cuisines of Kerala is an invaluable compendium of a culinary tradition and variety of food recipes that evolved out of Kerala's kitchens. The food trail is extensive and as varied as it can get. The proximity to the sea and the natural beauty and resources of the state—especially the fragrant spices which grew in abundance—attracted inhabitants of foreign soils and inspired them to initiate overseas trade along what was later known as the Spice Route. In a state with fish, other sea food and vegetables dominating

people's food habits, the various kinds of meats, foreign cooking techniques and exotic flavours were carried to life from foreign trade influences and became significant foods. There are numerous recipes in each foreign-influenced community in Kerala, well represented in this book, in meticulous detail. These recipes were cherished by the families and handed down generations via cross-cultural interactions within Jews of the Paradesi and Malabari sects, Syrian Christians, Muslims, Anglo-Indians, Latin Catholics and others who mingled with and evolved from the local populace. The book provides a well-researched and rich cultural history of foreign food culture, tracing how the new elements adapted to local food traditions and evolved as a parallel line of foods, creating new textures, flavours and tastes.

Colony of Haifa, the story of two houses that represent the narrative of Palestinians in Haifa and remembrances displayed through personal accounts of the cold winter in 1950. In this remarkable project, Jews and Palestinians, write together the history and memory of the city of Haifa. Rather than presenting incommensurable national narratives, they offer a fresh and inspiring alternative: each article is co-authored by Arabs and Jews, thus turning the art of research and writing into a bi-national practice. Addressing 1948 as a benchmark, is crucial particularly today in facilitating not only a new reading of the political story, but also offering political possibilities. Haifa Before & After 1948 is an inspirational book that deserves to be read by everyone who is interested in the history and memory of bi-national societies. This book assesses the role of identity and Chinese face culture in Chinese foreign policy by analyzing China's political and economic retaliation against South Korea's deployment of the THAAD (Terminal High Altitude Area Defense) system on its soil. By examining the history and military action of China, Japan, and North and South Korea, the book argues that China's divergent responses were caused by different expectations according to whether states had a

perceived identity as a friend or a rival. The author demonstrates that Chinese face culture shapes China's reaction to others through three dynamics of seeking, saving, and losing face. This book shows how identity and culture have worked in the relationship between China and neighboring countries through three case studies exploring North Korea's Taepodong-2 missile launch and first nuclear test in 2006, South Korea's decision to allow the United States to deploy the THAAD around 2016, and Japan's decision to deploy two U.S. X-band radars in 2005 and 2014. A timely analysis of the importance of identity and culture in international relations, the book will be of interest to scholars of Chinese foreign policy, Sino-South Korean relations, Sino-North Korean relations, Sino-Japanese relations, Korean Politics, Asian Politics, and International Relations.

From the internationally acclaimed and bestselling historians William Dalrymple and Anita Anand, the first comprehensive and authoritative history of the Koh-i-Noor diamond, arguably the most celebrated jewel in the world. On March 29, 1849, the ten-year-old leader of the Sikh kingdom of the Punjab was ushered into the magnificent Mirrored Hall at the center of the British fort in Lahore, India. There, in a formal Act of Submission, the frightened but dignified child handed over to the British East India Company swathes of the richest land in India and the single most valuable object in the subcontinent: the celebrated Koh-i-Noor diamond, otherwise known as the Mountain of Light. To celebrate the acquisition, the British East India Company commissioned a history of the diamond woven together from the gossip of the Delhi Bazaars. From that moment forward, the Koh-i-Noor became the most famous and mythological diamond in history, with thousands of people coming to see it at the 1851 Great Exhibition and still more thousands repeating the largely fictitious account of its passage

through history. Using original eyewitness accounts and chronicles never before translated into English, Dalrymple and Anand trace the true history of the diamond and disperse the myths and fantastic tales that have long surrounded this awe-inspiring jewel. The resulting history of south and central Asia tells a true tale of greed, conquest, murder, torture, colonialism, and appropriation that shaped a continent and the Koh-i-Noor itself.

In light of its upcoming centenary in 2016, the time seems ripe to ask: why, how and in what ways has memory of Ireland's 1916 Rising persisted over the decades? In pursuing answers to these questions, which are not only of historical concern, but of contemporary political and cultural importance, this book breaks new ground by offering a wide-ranging exploration of the making and remembrance of the story of 1916 in modern times. It draws together the interlocking dimensions of history-making, commemoration and heritage to reveal the Rising's undeniable influence upon modern Ireland's evolution, both instantaneous and long-term. In addition to furnishing a history of the tumultuous events of Easter 1916, which rattled the British Empire's foundations and enthused independence movements elsewhere, Ireland's 1916 Rising mainly concentrates on illuminating the evolving relationship between the Irish past and present. In doing so, it unearths the far-reaching political impacts and deep-seated

cultural legacies of the actions taken by the rebels, as evidenced by the most pivotal episodes in the Rising's commemoration and the myriad varieties of heritage associated with its memory. This volume also presents a wider perspective on the ways in which conceptualisations of heritage, culture and identity in Westernised societies are shaped by continuities and changes in politics, society and economy. In a topical conclusion, the book examines the legacy of Queen Elizabeth II's visit to the Garden of Remembrance in 2011, and looks to the Rising's 100th anniversary by identifying the common ground that can be found in pluralist and reconciliatory approaches to remembrance.
