A STEP-BY-STEP APPROACH TO DESIGNING ACCURATE DOSING REGIMENS Casebook in Pharmacokinetics and Drug Dosing uses real-life cases to teach pharmacy students, pharmacists, and clinical pharmacists how to apply pharmacokinetics to formulate proper dosing regimens. In order to be as clinically relevant as possible, the book not only discusses drugs with readily available therapeutic serum levels, but places equal emphasis on high-alert agents with narrow therapeutic indexes. Each drug chapter is written by clinical pharmacists who have hands-on experience in drug dosing and includes an overview of the drug's pharmacology, including: Indications Mechanisms of action Toxicities Pharmacokinetics There is comprehensive review and discussion of each drug's bioavailability, volume of distribution, clearance, half-life, therapeutic drug level monitoring, drug interactions, dosing, and availability. Each chapter is enhanced by numerous patient cases with clear step-by-step answers and explanations. Calculations, equations, and dosing recommendations are provided for each case.

"This is a modern multi-disciplinary text confronting a complex age and journey into recovery. It is a roadmap for every student of mental health who wants to put the most up-to-date practice fuel into their tank. The case study approach offers an authentic insight into life experiences of service users and allows the reader to re-think the relationship they have with vulnerable people in the middle of sensitive life challenges." Dr Dean-David Holyoake, University of Wolverhampton, UK This engaging book consists of 27 case studies which offer a realistic and insightful view into the experience of mental ill-health. A range of mental health problems are considered for people at different stages of the lifespan, from common problems such as anxiety or depression, through to severe and enduring conditions such as schizophrenia. Part of a new Case Book series, the book is written in an informative and clear style and utilises the latest evidence-based interventions and resources. The approach adopted: Incorporates recovery based principles Emphasizes the importance of collaborative working Values the person's perspective Actively empowers and advocates for the person to make their own decisions and choices Written and edited by academic experts and experienced clinicians, the cases all take a positive, person-centred approach focusing on recovery outcomes. The book addresses the biological, psychological, social and physical aspects in scenarios and includes areas of mental health which are often overlooked, such as alcohol and substance misuse amongst older adults. Mental health nurse training involves focusing on working with individuals one-to-one in a range of settings, and this case book will reflect and complement the skills and situations students face while training and on placement. Contributors: Geoffrey Amoateng, Jean-Louis Ayivor, May Baker, Alison Coad, Hilary Ford, Sally Goldspink, John Harrison, Mark McGrath, Michael Nash, Cliff Riordan, Heather Rugg, Noel Sawyer, Vanessa Skinner, Steve Wood.

This comprehensive collection presents a case-method approach to teaching business ethics, making it ideal for advanced

undergraduate- and graduate-level courses in both philosophy and business departments. It contains a wide range of individual, managerial, and corporate cases, many with an international perspective. All cases have been classroom-tested at the Harvard Business School; most have been developed in the field rather than in the library. The third edition is now in softcover for the first time with 15% fewer pages. Nine new cases (of the total 53 cases) cover such topics as labor-management trust, product liability, foreign bribery, the Dow bankruptcy over breast implant lawsuits, and more. A new appendix, "Ethical Frameworks for Management," provides students with ethical frameworks for analysis and a second new Appendix, "Bridging East and West in Management Ethics," discusses certain basic similarities between Asian and Western ethical ideals.

Case Studies in Finance links managerial decisions to capital markets and the expectations of investors. At the core of almost all of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps managers understand the impact of the firm on the world around it. These cases also invite students to apply modern information technology to the analysis of managerial decisions. The cases may be taught in many different combinations. The eight-part sequence indicated by the table of contents relates to course designs used at the authors' schools. Each part of the casebook suggests a concept module, with a particular orientation.
