'This extensively revised edition of A Handbook of Comparative Social Policy provides up-to-date and valuable insights on key concepts and issues, such as globalization, crime, diversity, housing, child poverty, gender inequality, and social policy regimes. To write about these topics, editor Patricia Kennett has gathered an excellent team of researchers, who deal with both the developing and the advanced industrial world. Students of comparative social policy would benefit from engaging with this illuminating Handbook.' Daniel Béland, JohnsonShoyama Graduate School of Public Policy, Canada The current context of social policy is one in which many of the old certainties of the past have been eroded. The predominantly inward-looking, domestic preoccupation of social policy has made way for a more integrated, international and outward approach to analysis which looks beyond the boundaries of the state. It is in this context that this Handbook brings together the work of key commentators in the field of comparative analysis in order to provide comprehensive coverage of contemporary debates and issues in cross-national social policy research. Organized around five themes, this thoroughly revised and updated second edition explores the contextual, conceptual, analytical and processual aspects of undertaking comparative social research. The contributions highlight specific areas of comparative social policy including child poverty and well-being, patterns of housing provision and housing inequalities, and social protection in East Asia as well as crime and criminology in a global context. The authors of the Handbook explore continuing and emerging themes as well as issues which are of particular relevance to understanding the contemporary social

world. International in scope, this authoritative Handbook presents original cutting-edge research from leading specialists and will become an indispensable source of reference for anyone interested in comparative and international social research. It will also prove a valuable study aid for undergraduate and postgraduate students from a range of disciplines including social policy, sociology, politics, urban studies and public policy.

A fascinating look into the life and work of controversial French novelist Irène Némirovsky Irène Némirovsky succeeded in creating a brilliant career as a novelist in the 1930s, only to have her life cut short: a "foreign Jew" in France, she was deported in 1942 and died in Auschwitz. But her two young daughters survived, and as adults they brought their mother back to life. In 2004, *Suite française*, Némirovsky's posthumous novel, became an international best seller; some critics, however, condemned her as a "self-hating Jew" whose earlier works were rife with anti-Semitic stereotypes. Informed by personal interviews with Némirovsky's descendants and others, as well as by extensive archival research, this wide-ranging intellectual biography situates Némirovsky in the literary and political climate of interwar France and recounts, for the first time, the postwar lives of her daughters. Némirovsky's Jewish works, Suleiman argues, should be read as explorations of the conflicted identities that shaped the lives of secular Jews in twentieth-century Europe and beyond.
