The SAGE Handbook of Propaganda tells a radical new story about propaganda, fake news and information warfare and their toxic impact on the communications revolution of the past twenty years. It explains how propaganda invades the human psyche, in what ways it does so, and in what contexts. This pervasive influence is particularly prevalent in world politics and international relations today. In this interdisciplinary Handbook, the editors have gathered together a group of world-class scholars from Europe, America, Asia, and the Middle East, to discuss leadership propaganda, war propaganda, propaganda for peace marketing, propaganda as a psychological tool, terror-enhanced propaganda, and the contemporary topics of internet-mediated propaganda. Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities. In the Australian context, the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change. Through the Global Studies Consortium (GSC), this new discipline is forming around an impressive body of international scholars who define their expertise in global terms. The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale. Mark Juergensmeyer and Helmut Anheier's forthcoming Encyclopaedia of Global Studies with SAGE is evidence of this growing international collaboration, while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization. RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally. Given these developments, the time is right for a book series that draws together diverse scholarship in global studies. This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field. The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology, anthropology, history, media and cultural studies, economics and governance, environmental sustainability, international law and criminal justice. Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core "global" concerns of narrative, praxis, space and place. This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century.

'With its list of distinguished contributors and its wide range of topics, the handbook is surely destined to become an invaluable resource for all serious students of nationalism' - Michael Billig, Professor of Social Sciences at Loughborough University and author of 'Banal Nationalism' (SAGE 1995) 'The persistence - some would say: revival - of nationalism across the recent history of modernity, in particular the past two decades, has taken many scholars in the social sciences by surprise. In response, interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon. What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other. This handbook does just that. It deserves particular praise for the wide range of approaches and topics included and for the systematic attempt at studying nationalism as a phenomenon of our time, not a remnant from the past' - Peter Wagner, Professor of Social and Political Theory, European University Institute; and Professor of Sociology, University of Warwick 'For students concerned with the contemporary study of nationalism this will be an invaluable publication. The three-fold division into approaches, themes and cases is a very solid and sensible one. The editors have commissioned essays from leading scholars in the field [and] this handbook provides the best single-volume overview of contemporary nationalism' - John Breuilly, Professor of Nationalism and Ethnicity, London School of Economics Nationalism has long excited debate in political, social and cultural theory and remains a key field of enquiry among historians, anthropologists, sociologists as well as political scientists. It is also one of the critical media issues of our time. There are, however, surprisingly few volumes that bring together the best of this intellectual diversity into one collection. This Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future. Its three sections guide the reader through the theoretical approaches to this field of study, its major themes - from modernity to memory, migration and genocide - and the diversity of nationalisms found around the globe. The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines, illuminate themes and issues of central importance in both historical and contemporary contexts, and show how nationalism has impacted upon and interacted with other political and social forms and forces. This book provides a much-needed resource for scholars in international relations, political science, social theory and sociology. Chosen by Library Journal as one of the best reference texts of 2016. Occupy. Indignados. The Tea Party. The Arab Spring. Anonymous. These and other terms have become part of an emerging lexicon in recent years, signalling an important development that has gripped many parts of the world: millions of people are increasingly involved, whether directly or indirectly, in movements of resistance and protestation. However, resistance and its conceptual "companions", protest, contestation, opposition, disobedience and mobilization, all seem to be still mostly seen in public and private discourses as illegitimate and problematic forms of action. The time is, therefore, ripe to delve into the concerns, themes and legitimacy. The SAGE Handbook of Resistance offers theoretical essays enabling readers to forge their own perspectives of what "is" resistance and emphasizes the empirical and experiential dimension of resistance - making

strong choices in terms of how contemporary topics related to resistance help to rethink our societies as “protest societies”. The coverage is divided into six key sub-sections: Foundations Sites of Resistance Technologies of Resistance Languages of Resistance Geographies of Resistance Consequences of Resistance

The Handbook of Research Management is a unique tool for the newly promoted research leader. Larger-scale projects are becoming more common throughout the social sciences and humanities, housed in centres, institutes and programmes. Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars. They

are responsible for the careers and professional development of others, and for managing interactions with university administrations and external stakeholders. Although many scientific and technological disciplines have long been organized in this way, few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice. This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder. The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers, and to provoke readers to think about how they might respond within their own contexts. This book will be a standard work of reference for new research leaders, in any discipline or country, looking for help and inspiration. The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them.

"An excellent guidebook through different approaches to social science measurement, including the all-important route-maps that show us how to get there." - Roger Jowell, City University "In this wide-ranging collection of chapters, written by acknowledged experts in their fields, Outhwaite and Turner have brought together material in one volume which will provide an extremely important platform for consideration of the full range of contemporary analytical and methodological issues." - Charles Crothers, Auckland University of Technology This is a jewel among methods Handbooks, bringing together a formidable collection of international contributors to comment on every aspect of the various central issues, complications and controversies in the core methodological traditions. It is designed to meet the needs of those disciplinary and nondisciplinary problem-oriented social inquirers for a comprehensive overview of the methodological literature. The text is divided into 7 sections: Overviews of methodological approaches in the social sciences Cases, comparisons and theory Quantification and experiment Rationality, complexity and collectivity Interpretation, critique and postmodernity Discourse construction Engagement. Edited by two leading figures in the field, the Handbook is a landmark work in the field of research methods. More than just a 'cookbook' that teaches readers how to master techniques, it will give social scientists in all disciplines an appreciation for the full range of methodological debates today, from the quantitative to the qualitative, giving them deeper and sharper insights into their own research questions. It will generate debate, solutions and a series of questions for researchers to exploit and develop in their research and teaching. Migration moves people, ideas and things. Migration shakes up political scenes and instigates new social movements. It redraws emotional landscapes and reshapes social networks, with traditional and digital media enabling, representing, and shaping the processes, relationships and people on the move. The deep entanglement of media and migration expands across the fields of political, cultural and social life. For example, migration is increasingly digitally tracked and surveilled, and national and international policy-making draws on data on migrant movement, anticipated movement, and biometrics to maintain a sense of control over the mobilities of humans and things. Also, social imaginaries are constituted in highly mediated environments where

information and emotions on migration are constantly shared on social and traditional media. Both, those migrating and those receiving them, turn to media and communicative practices to learn how to make sense of migration and to manage fears and desires associated with cross-border mobility in an increasingly porous but also controlled and divided world. The SAGE Handbook of Media and Migration offers a comprehensive overview of media and migration through new research, as well as a review of present scholarship in this expanding and promising field. It explores key interdisciplinary concepts and methodologies, and how these are challenged by new realities and the links between contemporary migration patterns and its use of mediated processes. Although primarily grounded in media and communication studies, the Handbook builds on research in the fields of sociology, anthropology, political science, urban studies, science and technology studies, human rights, development studies, and gender and sexuality studies, to bring to the forefront key theories, concepts and methodological approaches to the study of the movement of people. In seven parts, the Handbook dissects important areas of cross-disciplinary and generational discourse for graduate students, early career researcher, migration management practitioners, and academics in the fields of media and migration studies, international development, communication studies, and the wider social science discipline. Part One: Keywords and Legacies Part Two: Methodologies Part Three: Communities Part Four: Representations Part Five: Borders and Rights Part Six: Spatialities Part Seven: Conflicts
