

Undp Accounting And Finance Certification Test

In its journey from the margins to the mainstream, the idea of corporate responsibility has become a significant part of the business agenda. Whilst society has always held expectations of business that go beyond wealth creation, the backdrop against which businesses now operate - characterised by financial crisis, climate change, political shifts, and population growth - has seen corporate responsibility becoming increasingly central to the ability of businesses to address global concerns. In a world where prosperity is measured in terms of economic growth, the pressure on business to maximise profits whilst also being held publically accountable for its social and environmental record, continues to increase.

Drawing on numerous case studies, theories, and perspectives, this textbook explores what corporate responsibility reveals about the changing role of business in the twenty-first century. The third edition has been updated to reflect the full impact of the 2008-9 financial crisis and new examples of actual business practice have been presented throughout. These include: Google and their struggles with the Chinese government over censorship; Trafigura and their illegal dumping of toxic waste; and Proctor and Gamble and their charitable work to provide clean water to poor communities. The text is accompanied by an Online Resource Centre which includes: For students: Additional case studies Further reading Sources on regulation and governance Suggested films Web exercises Web links For lecturers: Images from the book

This is the first work of its kind. Original contributions from leading academicians, practitioners and accounting associations from around the world make this handbook a unique source of information on international accounting education and certification processes. A uniform format in most of the chapters allows for easy comparison between countries. This volume documents the development of accounting education and practice at country and global levels; studies the sensitivity of accounting education and practices to the unique socio-economic needs of its environment; and allows comparative studies at a time when attempts have begun to harmonize accounting education internationally. Most importantly, it shows how educational programmes around the world are preparing future accounting professionals to deal with the rapid technological and environmental changes of the 21st century.

Strengthening Governance Globally is the fifth volume in the series 'Patterns of Potential Human Progress'. Each volume considers one key aspect of how development unfolds globally and how better to move it in desired directions. This volume identifies the provision of security, the building of government capacity, and the broadening of inclusion of governance on which high-income countries have traditionally made long historical transitions. In contrast, many developing countries today struggle with all three governance transition dimensions simultaneously. Strengthening Governance Globally uses the growing empirical database on governance variables to understand historical change. Issue for 1946/47 includes a summary of the organization's activities from its inception to July 1, 1947.

This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system.

This publication provides guidance for national and local policymakers on the management of their assets in support of the 2030 Agenda for Sustainable Development.

World Bank Technical Paper No. 319S. Proposes a program for judicial reform in Latin America and the Caribbean which specifically addresses the main factors affecting the quality and monopolistic nature of court services and the resultant inefficiency. The paper looks at how the proposed reform program would address the economic and legal causes at the root of an inefficient and inequitable judiciary and discusses ways of reversing the situation.

Providing a comprehensive framework for a sustainable governance model, and how to leverage it in competing global markets, Governance, Risk, and Compliance Handbook presents a readable overview to the political, regulatory, technical, process, and people considerations in complying with an ever more demanding regulatory environment and achievement of good corporate governance. Offering an international overview, this book features contributions from sixty-four industry experts from fifteen countries.

Agricultural production needs to grow by 60 percent between 2005 and 2050 to feed the world's growing population, which is expected to reach 9.3 billion by 2050. 6 billion out of 9.3 will live in urban areas, roughly meaning some part of 3 billion rural habitants (who are farmers) will feed 9.3 billion people, with limited land and water and against challenges of changing climate. Every year, USD 83 billion (in 2009 USD) should be invested in the developing world to double their agricultural production.

UNDP, considering the demand from regional governments and international community, initiated a project for a tripartite regional consortium in Afghanistan, Kyrgyzstan and Tajikistan in agro-food industry. The first phase is concluded in October 2015 when the Memorandum of Understanding establishing the Afghanistan, Kyrgyzstan and Tajikistan (AKT) Agro-food Industry Consortium signed by the governments; and the AKT Agro-food Industry Consortium launched at Dushanbe in October 2015. As part of the Feasibility & Build Up Phase, a comprehensive feasibility study started immediately after the launch. This analytical and diagnostic work provides the most detailed assessment of agro-food value chains in in Afghanistan, Kyrgyzstan and Tajikistan to date, and identifies a set of concrete investment areas at the micro, meso and macro levels.

Securing Development: Public Finance and the Security Sector highlights the role of public finance in the delivery of security and criminal justice services. This book offers a framework for analyzing public financial management, financial transparency, and oversight, as well as expenditure policy issues that determine how to most appropriately manage security and justice services. The interplay among security, justice, and public finance is still a relatively unexplored area of development. Such a perspective can help security actors provide more professional, effective, and efficient security and justice services for citizens, while also strengthening systems for accountability. The book is the result of a project undertaken jointly by staff from the World Bank and the United Nations, integrating the disciplines where each institution holds a comparative advantage and a core mandate. The primary audience includes government officials bearing both security and financial responsibilities, staff of international organizations working on public expenditure management and security sector issues, academics, and development practitioners working in an advisory capacity.

The third and final in a series, this text bridges the conceptual foundations of capacity development and the difficulties and practical realities in the field. It demystifies the process of capacity development to make it more user-friendly. The book has two parts. The first shows how long-standing development dilemmas can be turned into opportunities for capacity development and societal transformation. It proposes a set of principles to guide the search for context-specific approaches as the norm, and based on these default principles the authors explore relevant issues in comprehensible stages through a capacity lens. The second part is a compilation of experiences and lessons from around the world, to showcase promising initiatives and innovative solutions. It forms a casebook of insights and good (rather than best) practices on how development stakeholders can turn development dilemmas into opportunities tailored to the needs of their societies.

The first volume describes the results of a study of financial management and governance arrangements in Cambodia, People's Republic of China, Mongolia, Pakistan, Papua New Guinea, Uzbekistan, and Viet Nam. Vols. [2-8] are comprehensive reports for each country.

Now in its second edition, this successful textbook examines the multiple dimensions of corporate responsibility. Offering a perfect balance of theoretical and practical coverage, it provides a historical and interdisciplinary overview of the field; a summary of different management approaches; and a review of key actors and trends worldwide. The authors adopt a critical perspective that encourages students to debate various issues in this ever-evolving field. By combining an insightful and interdisciplinary approach with the pedagogy that students need, *Corporate Responsibility, Second Edition*, provides a comprehensive introduction to the subject.

As debates rage about the responsibilities of business and government in global extractives industries, there remains a significant lack of empirical research and theoretical analysis focused on the dynamics of resource extraction, governance and corporate social responsibility. This collection takes a broad, 'governance ecosystem' view to exploring the complex and cross-cutting relationships between key actors involved in and affected by mining governance in Latin America. Case studies include the Kimberley process over conflict diamonds, the PERCAN Initiative in Peru, the Carajas iron ore complex in the Brazilian Amazon, Apex and Empresa Huanuni in Bolivia, and the gold producers Newmont and Goldcorp. -- Publisher description.

Official Records Principles of Sustainable Finance Oxford University Press

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Viet Nam has become a leading regional market for renewable energy in a short space of time led by private sector investment facilitated by favourable support mechanisms. The Clean Energy Finance and Investment Policy Review of Viet Nam provides a comprehensive overview of the current policy framework, highlighting progress and identifying untapped opportunities for strengthening policy interventions that can help scale up clean energy finance and investment.

There is increasing interest in the Asian arena; both as a home for the delivery of international higher education and as a breeding ground for a new brand of sustainable domestic and international growth. Academics are increasingly turning to Asia and Asian Education in order to better understand and predict the emerging trends of global education and this book will serve to provide a forum for debate of this nature. The book provides an insight into the interplay of Asian and European education, identifies the key areas for further development and firmly grounds the approach as one of conversation and dialogue, rather than one-sided dictation. It also highlights the critical issues within the development of international education, discusses the value and challenges of existing TNE practices as a mechanism to respond to the emerging Asian needs and provides an insight into the future direction of education in the Asian century.

Global Biodiversity Finance sets out the case for scaling up Payments for Ecosystem Services (PES) at the international level. The book explores how International Payments for Ecosystem Services (IPES) can help capture the global willingness-to-pay for

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The UNDP Crisis Prevention and Recovery Report 2008 titled *Post-Conflict Economic Recovery: Enabling Local Ingenuity*, is a comprehensive analysis focusing on three critical factors: the importance of local ingenuity to guide recovery, the state's role in promoting this ingenuity, and the policies needed to rebuild battered economies and reduce the risk of conflict recurrence. The study cites examples of countries that have succeeded in rekindling post-conflict economies and those that continue to flounder, discussing the foundations that are so vital to foster post-conflict economic recovery.

This 10th edition of the Human Development Report offers cutting-edge analysis of the economic, social and political outcomes of this present era of globalisation.

Finance is widely seen as an obstacle to a better world. *Principles of Sustainable Finance* explains how the financial sector can be mobilized to counter this. Using finance as a means to achieve social goals we can divert the planet and its economy from its current path to a world that is sustainable for all. Written for undergraduate, graduate, and executive students of finance, economics, business, and sustainability, this textbook combines theory, empirical data, and policy to explain the sustainability challenges for corporate investment. It shows how finance can steer funding to certain companies and projects without sacrificing return and thus speed up the transition to a sustainable economy. It analyses the Sustainable Development Goals as a strategy for a better world and provides evidence that environmental, social, and governance factors matter, explaining in detail how to incorporate these factors in the corporate and financial sectors. Tailored for students, *Principles of Sustainable Finance* starts each chapter with an overview and learning objectives to support study. It includes suggestions for further reading, lists and definitions of key concepts, and extensive uses of figures, boxes, and tables to enhance educational goals and clarify concepts. *Principles of Sustainable Finance* is also supported by an online resource that includes teaching materials and cases.

In many countries and sectors, public procurement is developing from a functional orientation to an effective socio-economic policy lever. There is a great interest among managers and academics to learn from other countries' and other sectors' change initiatives and how they dealt with the challenges they encountered. This text provides such learning

opportunities, presenting case studies of public procurement, covering diverse nations, sectors and issues. The cases are combined with editorial commentary and contextualizing chapters to assist the student reader in understanding this complex topic. The text combines descriptions of cases of public procurement with cross case analysis to draw out the key dimensions to enable further examination of the central themes. Each case study concludes with three questions to aid its use as a teaching and training text. Edited by a team of internationally recognised experts in the field this innovative text illustrates the strategies and innovations within public procurement on a global scale and highlights common problems that all countries encounter. Public Procurement is vital reading for anyone with an interest in this topical area.

This report takes a broad view of the link between work and human development. Work is a critical tool for economic growth and security, poverty reduction and gender equality. It enables full participation in society while affording people a sense of dignity and worth. Humans working together not only increase their material well-being, they also accumulate a wide body of knowledge that serves as the basis for cultures and civilizations. The report finds that work enhances human development when policies are taken to expand productive, remunerative and satisfying work opportunities. Workers' skills and potentials are enhanced, their well-being in terms of rights, safety and benefits are ensured with targeted interventions, and an agenda incorporating decent work, a new Social Contract and a Global Deal is pursued.
