"Corporate Finance: A South African perspective 2e takes a fresh principles-based approach to the study of financial management. It is aimed at second and third-year students following courses in financial management in BCom or BBusSc degree programmes. The book explains financial management concepts and practice in an accessible and concise way, while supporting students with plenty of practice examples and illustrations of real-life application."--Publisher's description.

The tourism and hospitality industries are seeing continued success, which is why so many new businesses are trying to find a foothold in the field. However, the functions and responsibilities of management differ heavily between organizations within the tourism industry, such as the differences faced by big chain hotels, family owned hotels, and individually owned hotels. Understanding the methods of managing such companies is vital to ensuring their success. Industrial and Managerial Solutions for Tourism Enterprises is a pivotal reference source that focuses on the latest developments on management in the tourism and hospitality industries. Highlighting a range of topics including core competency, customer relationship management, and departmental relationships, this book is ideally designed for managers, restaurateurs, tour developers, destination management professionals, travel agencies, tourism media journalists, hotel managers, management consulting companies, human resources professionals, performance evaluators, researchers, academicians, and students.

This easy-to-understand, user-friendly reference tool covers the three major decision-making areas in financial management: the investment, financing, and asset management decisions. It enables readers to understand the financial decision-making process, interpret the impact that financial decisions will have on value creation, and develop a strong understanding of how funds are raised and allocated by today's businesses. Financial exploration includes the basic time value of money concepts, working capital management, capital budgeting techniques, estimating cash flows, electronic commerce, outsourcing, limited liability companies, strategic alliances, and financial statement analysis. For participants in management development programs, candidates preparing for various professional exams, and practicing finance professionals—such as Financial and Loan Analysts; Financial, Cash, and Credit Managers; Controllers, Managerial Accountants; Lending Officers, and Treasurers.

The book addresses several problems in contemporary corporate finance: optimal capital structure, both in the US and in the G7 economies; the Capital Asset Pricing Model (CAPM) and the Arbitrage Pricing Model (APT) and the implications for the cost of capital; dividend policy; sales forecasting and pro forma statement analysis; leverage and bankruptcy; and mergers and acquisitions. It is designed to be used as an advanced graduate corporate financial management textbook.

Integrating financial theory and practice, this text explores the theory of finance as it relates to a corporation's investment in assets, financing and dividends. It explains ways in which analytical techniques are brought to bear on financial decision making and supplies the institutional material necessary to aid in student's understanding of the environment in which financial decisions are made.

This book presents analyses, from three points of view, of the use of computing technology in higher education. It considers application areas including office automation, distributed academic computing, distributed administrative computing, instructional systems, and information resources.

In the four years between 1881 and 1885, Canada was forged into one nation by the building of the Canadian Pacific Railway. The Last Spike reconstructs the incredible story of how some 2,000 miles of steel crossed the continent in just five years — exactly half the time stipulated in the contract. Pierre Berton recreates the adventures that were part of this vast undertaking: the railway on the brink of bankruptcy, with one hour between it and ruin; the extraordinary land boom of Winnipeg in 1881–1882; and the epic tale of how William Van Horne rushed 3,000 soldiers over a half-finished railway to quell the Riel Rebellion. Dominating the whole saga are the men who made it all possible — a host of astonishing characters: Van Horne, the powerhouse behind the vision of a transcontinental railroad; Rogers, the eccentric surveyor; Onderdonk, the cool New Yorker; Stephen, the most emotional of businessmen; Father Lacombe, the black-robed voyageur; Sam Steele, of the North West Mounted Police; Gabriel Dumont, the Prince of the Prairies; more than 7,000 Chinese workers, toiling and dying in the canyons of the Fraser Valley; and many more — land sharks, construction geniuses, politicians, and entrepreneurs — all of whom played a role in the founding of the new Canada west of Ontario. Intended as an introductory course, this text contains updated institutional material which is international in scope and deals with the effects of electronic commerce. It provides tips, questions and answers and special features.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Known for its real-world examples and effective problem sets, this undergraduate corporate finance course is now in its 9th edition and includes a student resource CD-ROM, with Excel tutorials and additional practice problems. The tenth edition features InfoTrac college edition access.

Forests throughout the world are undergoing rapid, far-reaching change as a result of natural and anthropogenic disturbances. The challenge is to manage these forests in ways that avoid formulaic approaches to complex issues. This book takes on the challenge of balancing local economies, wood products, and biodiversity by proposing diverse new approaches to forest management using new research from the moist coniferous forests of the Pacific Northwest. --

This textbook presents a comprehensive treatment of the legal arrangement of the corporation, the instruments and institutions through which capital can be raised, the management of the flow of funds through the individual firm, and the methods of dividing the risks and returns among the various contributors of funds. Now in its second edition, the book covers a wide range of topics in corporate finance, from time series modeling and regression analysis to multi-factor risk models and the Capital Asset Pricing Model. Guerard, Gultekin and Saxena build significantly on the first edition of the text, but retain the core chapters on cornerstone topics such as mergers and acquisitions, regulatory environments, bankruptcy and various other foundational concepts of corporate finance. New to the second edition are examinations of APT portfolio selection and time series modeling and forecasting through SAS, SCA and OxMetrics programming, FactSet fundamental data templates. This is intended to be a graduate-level textbook, and could be used as a primary text in upper level MBA and Financial Engineering courses, as well as a supplementary text for graduate courses in financial data analysis and financial investments.

This book is an introduction-level text that reviews, discusses, and integrates both theoretical and practical corporate analysis and planning. The field can be divided into five parts: (1) Information and Methodology for Financial Analysis; (2) Alternative Finance Theories and Cost of Capital; (3) Capital Budgeting and Leasing Decisions; (4) Corporate Policies and their Interrelationships; (5) Financial Planning and Forecasting. The theories used and discussed in this book can be grouped into the following classical theoretical areas of corporate finance: (1) Pre-M&M Theory, (2) M&M Theory, (3) CAPM, and (4) Option Pricing Theory (OPT). The interrelationships among these theories are carefully analyzed. Real world examples are used to enrich the learning experience; and alternative planning and forecasting models are used to show how the interdisciplinary approach can be used to make meaningful financial-management decisions. In this third edition, we have extensively updated and expanded the topics of financial analysis, planning and forecasting. New chapters were added, and some chapters combined to present a holistic view of the subject and much of the data revised and updated.

We usually think of cities as the domain of humans—but we are just one of thousands of species that call the urban landscape home. Chicago residents knowingly move among familiar creatures like squirrels, pigeons, and dogs, but might be surprised to learn about all the leafhoppers and water bears, black-crowned night herons and bison, beavers and massasauga rattlesnakes that are living alongside them. City Creatures introduces readers to an astonishing diversity of urban wildlife with a unique and accessible mix of essays, poetry, paintings, and

photographs. The contributors bring a story-based approach to this urban safari, taking readers on birding expeditions to the Magic Hedge at Montrose Harbor on the North Side, canoe trips down the South Fork of the Chicago River (better known as Bubbly Creek), and insect-collecting forays or restoration work days in the suburban forest preserves. The book is organized into six sections, each highlighting one type of place in which people might encounter animals in the city and suburbs. For example, schoolyard chickens and warrior wasps populate "Backyard Diversity," live giraffes loom at the zoo and taxidermy-in-progress pheasants fascinate museum-goers in "Animals on Display," and a chorus of deep-freeze frogs awaits in "Water Worlds." Although the book is rooted in Chicago's landscape, nature lovers from cities around the globe will find a wealth of urban animal encounters that will open their senses to a new world that has been there all along. Its powerful combination of insightful narratives, numinous poetry, and full-color art throughout will help readers see the city—and the creatures who share it with us—in an entirely new light.
